8.4 RC2

Some regressions are fixed that where introduced in RC1 compared to 833 (When having a login solution that has a login form that extends a form), also a few more clean ups that where found because of the new PersistIndex that is an index for the whole solution model. Also fixed for NGClient is showing a modal dialog, that wouldn't always show the correct size.

Window plugin has now an additional api to create a FormPopup that makes it easier to use and the requirement to have a scope and return dataprovider is gone.

The RestWS plugin has now the same properties again as it had in an older release (7 or 8.0 or 8.1) release, we only now have a maxPoolsizePerSolution property. We removed the global poolsize.

A feature we backported from the next servoy release after 8.4 is SVY-12956 so that tables defined for an hsql in memory datasource are auto created at startup. (don't confuse with datasources.mem)

Components	Key	Summary
Developer, Runtime	SVY-13032	Create a PersistIndex class that hold the uuid,id,name indexes of the FS
Runtime	SVY-12493	Array support in datasources from stored procedures
NGClient, SmartClient, Web Client	SVY-13070	plugins.window.showFormPopup
Developer, Server	SVY-12956	When starting up developer automatically create tables for in-mem servers that have .dbi files
Developer	SVY-13076	Auto populate war file name/path with defaults in war export wizard
Developer	SVY-13127	Request to change some default servoy settings
API, Runtime	SVY-12831	Support Array of values in security.setTenantValue()
SmartClient	SVY-13110	Slowness issues in 8.4 RC1
Server	SVY-13094	Server locks clients
Server	SVY-12988	PreImportHook is failing due to Schema Lock
Runtime	SVY-13062	i18n.getDefaultXxxxFormat returns `!${my.i18n.key}!` when having set an i18n key as the default format through the admin page
Runtime	SVY-13063	i18n.getDefaultXxxxxFormat methods return the default format in the Locale of the Server, not the current client
Runtime	SVY-13006	solutionModel.cloneComponent returns null when cloning inherited element
Runtime	SVY-13131	Login with modules stopped working in 8.4rc1
Runtime	SVY-13106	Incorrect SQL returned from databaseManager.getSQL() when combined with Table Filter
NGClient	SVY-13002	Form controller readOnly reset to true (parent form property) when svyServoyapi.hideForm is called in tabpanel
NGClient	SVY-13113	error after installing extar stuff trhough package manager 8.4rcv1
NGClient	SVY-13122	Clasic ListView modal size is not maintained on NG
NGClient	SVY-13060	Searching for dates in UI of NG client does not work
NGClient	SVY-13107	Bootstrap Tab Panel

NGClient	SVY-13130	Get MSG: TypeError
Extensions	SVY-13133	Rest-ws plugin max poolsize inconsistencies
Extensions, NGClient	SVY-13068	Bootstrap calendar triggering onDataChange when having placeholdertext
Extensions, NGClient	SVY-13100	bootstrapcomponents-button visible propery not working
Extensions, NGClient	SVY-13086	bootstrapcomponents-textbox empty issue
Developer	SVY-13087	Always export i18n table (if set) column info
Developer	SVY-13126	Error - Serializing and Deserializing Problem
Developer	SVY-13136	Servoy 8.4.0 RC1 Error after updating from 8.3.3
