# Forms

**Property Summary**

| | |
|---|---|
| Array | #allnames<br>Get all form names of the current solution. |
| Number | #length<br>Get the number of forms loaded into memory. |

**Property Details**

allnames

Get all form names of the current solution.

**Returns**

Array

**Sample**

```
var allFormNames = forms.allnames;
application.output("There are " + allFormNames.length + " forms.");
for (var i=0; i<allFormNames.length; i++)
{
        var f = forms[allFormNames[i]];
        application.output("Form " + allFormNames[i] + " has selected index " + f.controller.
getSelectedIndex());
}
```

length

Get the number of forms loaded into memory.

**Returns**

Number

**Sample**

```
application.output("Number of forms loaded into memory: " + forms.length);
```
