

8.2.2 RC

Issue [SVY-11517](#) added property 'servoy.server.queryUseLastResultSet', if that is set to true then most of the queries servoy executes on the database will be done with a different command so that the query can result in multiply result sets. This way if `getDataSetByQuery()` would execute more a stored procedure then really one sql statement, it still will return something (the last result set). For example the real driver of Microsoft will not allow this in the normal execute.

NGClient templates for certain stuff like error pages can be overridden completely like described [here](#) or keep the default templates and redirect only smaller parts of it described [here](#). That last one just means that you can have any kind of filename and you fill that filename in on the admin page for that property.

We have support for Progress database sequences: [SVY-11353](#)

If you spit up or use many css files from the solutions main css by using import statements in the main css file, browser caching can be a problem when you redeploy. Now you can give the url of the import a special parameter, which Servoy will be replacing when generating the WAR: [Css URL Import](#)

Components	Key	Summary
Developer	SVY-11609	Creating war file is failed
Developer	SVY-11521	Commandline export argument -pl should go deeper than 1 folder
Developer	SVY-11517	Error with com.microsoft.sqlserver.jdbc.SQLServerDriver
Developer	SVY-11706	WAR Export wizard bombs out
Developer	SVY-11640	Open form hierarchy called from context menu in script editor opens wrong form
Developer	SVY-11613	It should be possible to extend a non-responsive form from an existing responsive form
Developer	SVY-11739	JSDoc in code completion doesn't render correctly for components and services
Developer	SVY-11626	Serious performance issues in the IDE when extending a form
Developer	SVY-11789	You can't navigate from the datasource property to the in memory datasource
Developer	SVY-11730	Warning about touching abstract forms is invalid when calling a web service from Developer
Developer	SVY-11742	overrideSequenceTypes in commandline WAR export doesn't work
Developer	SVY-11722	Moving an element from one container to the other does not work
Developer, DLTK	SVY-11586	Invalid build marker
Documentation, NGClient	SVY-11645	Check if component is in absolute layout with <code>\$scope.parent.absoluteLayout</code>
Extensions	SVY-11564	Jasper plugin tries to load <code>/lib/commons-dbc.jar</code> which is no longer there
Extensions	SVY-11659	<code>getException</code> in <code>plugins.rawSQL</code> not working for <code>executeStoredProcudure</code>
Extensions	SVY-11744	Expose more RabbitMQ connection parameters on broadcaster plugin
Extensions	SVY-11820	Add <code>channelName</code> as 3rd argument to the callback used for Broadcasters
Extensions	SVY-11657	conflicting poi lib version on excel and jasper plugins
NGClient	SVY-11638	Servoy Calendar component does not update underlying value
NGClient	SVY-11624	Function <code>"application.getIPAddress"</code> returns additional double quotes
NGClient	SVY-11606	DBTreeView not showing in NG Client when form is closed and then shown again
NGClient	SVY-11592	model content (and console api) not available when serverside scripts gets loaded/initialized
NGClient	SVY-11376	Date field with combobox with format does niet work in NGclient
NGClient	SVY-11596	Change on element's format is not instantly reflected
NGClient	SVY-11675	NPE when trying to 'read' null values in foundset linked types
NGClient	SVY-11604	When screen get resized the servoy grid extra components(and columns) not adjusted properly
NGClient	SVY-11257	Table Component Column Labels
NGClient	SVY-11637	Bootstrap Calendar component does not fire <code>onElementFocusGained/Lost</code> of form
NGClient	SVY-11574	Table Component - Column Width

NGClient	SVY-11581	Time outs in NGClient invoking API when changing values of PK columns
NGClient	SVY-11559	Combo Box Behavior
NGClient	SVY-11688	tinyMCE does not resize to the proper height when using plugins
NGClient	SVY-11612	A space is added after the last column even when vertical scrollbar is set to never
NGClient	SVY-11565	always call foundset change listener when websocket incoming message handling is done
NGClient	SVY-11615	Show id (db identity) after save a new record in a record view
NGClient	SVY-11723	Add "dataProvider" and "format" to Bootstrap label
NGClient	SVY-11571	Inserting a single row into a foundset used in a Web Component triggers a NOTIFY_VIEW_PORT_ROWS_COMPLETELY_CHANGED instead of NOTIFY_VIEW_PORT_ROW_UPDATES_RECEIVED
NGClient	SVY-11713	Can't customize (all) html templates when using Resource minimizer in WAR export
NGClient	SVY-11711	Documentation on branding in the NGClient is wrong/incomplete
NGClient	SVY-11771	Saving large string to CLOB column in ProgressDB
NGClient	SVY-11785	Change between style handling for split panes from 8.1 to 8.2
NGClient	SVY-11689	Responsive form defaulted to height: 100%.
NGClient, SmartClient	SVY-11838	Sevoy hangs completely on _dataset.createDataSource
NGClient	SVY-11773	Setting the valuelist (or imageMedia) property of an inherited element to -none- gives runtime errors in the logs
NGClient	SVY-11690	Empty text fields type Date show "Invalid date" after focus
NGClient	SVY-11716	removeStyleClass/addStyleClass not working properly after deleting records in a table
NGClient	SVY-11746	In NgClient popup plugin not works as in web client. Not respect location and failed when click on the header of grid
NGClient	SVY-11747	Cannot change css for popup form on the specific form in solution. Changes applied for all popup on the whole solution
NGClient	SVY-11627	NG Client Responsive: focus to the top of the page
Server, SmartClient	SVY-11699	SmartClient performance is very bad in 8.2 due to changes in rmitnl.jar
Server	SVY-11708	Server does not save any properties when "Overwrite all Servoy properties" is set to true
Server	SVY-11700	link on admin page to client doesn't use tomcat war directory
Server	SVY-11485	Make logging consistent for warnings related to cross DB vendor datamodel compatibility
Server	SVY-11704	RestWS response headers don't handle properly an '=' sign
Server	SVY-11353	Progress Database Sequence support
Server	SVY-11724	Unknown errorCode 100[DataDriect][OpenEdge JDBC Driver][OpenEdge] Syntax error in SQL statement
SmartClient	SVY-11692	NPE on type aheads with no value list attached
WebClient	SVY-11676	More information about "couldn't load dataset because foundset had edited records but couldn't save it"
