

8.3 RC2

One feature in the [Rest Servlet Plugin](#), it is now possible to control the incoming and outgoing request/response objects.

Lots of DOC related cases in the developer for code completion and validation

Some regressions found about validation of code in the developer (wrong warnings/errors)

Some small other fixes

Components	Key	Summary
Developer, DLTK	SVY-8452	Automatically insert @override JSDoc tag on methods that override a super method
Developer, DLTK	SVY-9546	toISOString on date object
Developer, DLTK	SVY-7334	Deprecated relations give no warning if used without scope
Developer, DLTK	SVY-11258	String.match(regex) JSDoc Oddity
Developer, DLTK	SVY-9945	Array.shift return type missing
Developer, DLTK	SVY-11412	Function "trim" of String class works but is not recognized
Developer, DLTK	SVY-10669	Array.reduce not recognized, while supported
Developer, DLTK	SVY-11603	entity scope code completion only matches 1 method of a foundset
Extensions	SVY-12260	Supply the http headers of an incoming rest_ws call
Extensions, NGClient	SVY-12330	Upgrade bootstrap.js in servoydefaultservices/dialogs to current version 3.3.7
Extensions, NGClient	SVY-12336	Recreating a svy-extra-table fails after columns used value lists
NGClient	SVY-12352	File open dialog opens in background when opened from multiple dialogs
NGClient	SVY-12333	Using ExecuteInLineScript is not done correctly with Extends form
NGClient	SVY-12345	Regression in number formats
Server	SVY-12315	java.lang.InterruptedExceptio
Developer, SmartClient	SVY-12353	Aggregations do not work correctly with MsSql
