

2019.03_RC

See [2019.03 Whats new](#) for more information about what is new in this release.

Because of the less changes we made in 2019.03 compared to 8.4 a manual conversion needs to be done:

In 8.4 we have this situation:

We generate 2 less files, One is an empty SolutionName.less and the other a servoy_theme_properties.less file that has already all the properties the servoy_theme uses to configure.

No @imports are in those files because 8.4 did concat the files together internally (SolutionName.less + servoy_theme_properties.less + (internal) servoy_theme.less)

In 2019.03 this situation did change because we now fully depend on import statements in the less file

We still generate 2 files:

1> SolutionName.less, not empty anymore but it imports the second generated file: @import 'custom_servoy_theme_properties.less';

2> custom_servoy_theme_properties.less that file by default only has 1 import: @import 'servoy_theme.less?version=2019.3.0';
That points to a internal servoy.less file with that version.

The Less Compiler will get the SolutionName.less, that will then first import the custom_servoy_theme_properties.less that file will import the internal servoy_theme.less
(and that one will also import the standard servoy_theme_properties.less file that was generated in 84)

So to convert from a 84 setup to a the new 2019.03 setup you need to rename your servoy_theme_properties.less to custom_servoy_theme_properties.less
remove at least all the properties that you didn't really change (and maybe check the editor later if the custom properties are there).
Add the import @import 'servoy_theme.less?version=2019.3.0'; on top of the file.

Then also change the SolutionName.less file to import that file: @import 'custom_servoy_theme_properties.less';

Components	Key	Summary
API, Documentation	SVY-13395	Addition to documentation of application.createWindow
Developer	SVY-13066	Solution Explorer: 'Styles' node should be hidden for NG
Developer	SVY-13065	New form wizard: Style property should be disabled/hidden
Developer	SVY-12960	JSLib.string.split(separator:regex, [limit:number]) variant not recognized
Developer	SVY-13354	After some time the login page stops working.
Developer	SVY-13293	check Less support in WarExporter and use import statements in the solution less styling
Developer	SVY-13277	Change a few default preferences in developer as we ship it
Developer	SVY-13279	list form component - list view option
Developer	SVY-13256	[hackathon] Duplicate bootstrap Column or Row
Developer	SVY-13346	Cache all the webpackages stuff so that showing the WPM is quickly at least the second time
Developer	SVY-13425	display the display name in the components selector of the outline view add->componnets
Developer	SVY-13275	finish up the new solution/module wizard

Developer, NGClient	SVY-12570	CSS Themes: Allow for visual .less editing
Developer	SVY-13088	Show modules sorted by name in developer
Developer	SVY-13074	Duplicate form dialog - add to workingset
Developer	SVY-13205	Typo in war exporter
Developer	SVY-13170	Developer: start smart client action not working at startup
Developer, Documentation	SVY-13056	war_export command line
Developer	SVY-13223	filter templates by layout type also in the old editor action and palette
Developer	SVY-13260	Export wizard wont show when exporting war file.
Developer	SVY-11795	Set 'Show Line Numbers' on in Servoy platform as default
Developer	SVY-13239	Get user confirmation before Convert all absolute forms to css positions forms
Developer	SVY-13255	Developer does not references to overrided onShow method
Developer	SVY-5816	Type not recognized when set as Object.<String, scopes.xx.someTypeDef>
Developer, DLTK	SVY-9077	typedef's not working properly
Developer	SVY-6283	@typedef generate warnings when referenced out of scope.
Developer	SVY-13220	Default Solution Import options when database not found
Developer	SVY-13182	War exporter should restrict bad war filename input
Developer	SVY-13191	Several contextmenu options available on the rootNode of the media library in the Solex missing on subfolders
Developer	SVY-13291	import support for less files
Developer	SVY-13229	When converting a form to CSS Position inheriting forms are messed up
Developer, Installer	SVY-13243	Create a LTS channel for the developer (update site) and our application server updater
Developer	SVY-13307	Unexpected warning "FormComponent" yyy uses different datasource than form xxx
Developer	SVY-13213	Changing a valuelist name not allowed to add a prefix or text before the first char
Developer	SVY-13203	Developer: invalid dobserver does is not marked visually in solution explorer
Developer	SVY-13163	Adding templates using Outline instead of drag and dropping
Developer	SVY-13174	Directly doing a right mouse on a solution in all Solutions gives wrong menu items
Developer, DLTK	SVY-12012	Issues using @typedef JSDoc tag
Developer	SVY-13316	form is marked as dirty if you cancel add component or template
Developer	SVY-13368	Option persistence when exporting a solution

Developer, Server	SVY-13337	Remove Java `MaxPermSize` settings
Developer, NGClient	SVY-13335	Code completion doesn't work well with extended form components
Developer	SVY-13416	New value list type definition leads to dirty editor
Developer	SVY-13233	Cannot see the recently created form component in the containedForm picker of a List FormComponent
Developer	SVY-13204	add missing icons for breakpoints and help view
Developer	SVY-13373	Cannot Override Methods from Extended Form
DLTK	SVY-13304	Refactor->extract method doesn't work properly
Documentation	SVY-13238	Improve Developer Help when creating new solution or form
Extensions, NGClient	SVY-12907	Collapsible double click
Extensions, NGClient	SVY-13068	Bootstrap calendar triggering onDataChange when having placeholder text
Extensions, NGClient	SVY-13313	AG Grid - Editable Field with Null Value
Extensions	SVY-13380	"find" on a aggrid-bound foundset that produces zero results is erroring out
Extensions	SVY-13371	Aggrid not updating styleclassDataprovider when no dataprovider connected
Extensions, NGClient	SVY-13142	Chrome/Safari Autocomplete for bootstrap fields are not working
Extensions, NGClient	SVY-10291	investigate if we can make the oauth plugin work with NG client
Extensions, NGClient	SVY-13250	When navigating through bootstrapextracomponents-navbar element, the browsers back button needs to be clicked twice to go back
Extensions, NGClient	SVY-13198	AGGrid not updating value when using tab key
Extensions	SVY-13312	PreemptiveAuthentication not working anymore for the http plugin
Extensions	SVY-13235	[AG Grid] grid rendering breaks/stops when the column on which is grouped is also sorted
Extensions	SVY-13237	exception in svy-extra-table in method scrollToRenderedIfNeeded
Extensions, NGClient	SVY-13225	AGgrid - Headers to do not wrap correctly when resizing screen.
Extensions, NGClient	SVY-12810	ag grid support multiselect toggle via scripting while the grid is visible
Extensions, NGClient	SVY-13349	keepOpen in bootstrap calendar
Extensions, NGClient	SVY-13059	Ag-grid scroll to selection
Installer	SVY-13340	Installer makes installing documentation mandatory
MobileClient	SVY-13228	phonegap export index.html should link cordova.js not phonegap.js
NGClient	SVY-13376	build and test Servoy 2019.03 RC
NGClient	SVY-13166	Choicegroup doesn't display value 'false' or '0' correctly.

NGClient	SVY-12998	Combobox- and typeahead-pop-ups don't reposition during scrolling
NGClient	SVY-13144	Client-side error with Table extra when no dapraprovider is set
NGClient	SVY-13152	Ag-Grid: switching from Group to non Group mode and render again the form results in blocked selection.
NGClient	SVY-13160	validation tooltip is not always removed
NGClient	SVY-13234	Error switching the containedForm of a tabpanel (Bootstrap)
NGClient	SVY-13199	AG Grid - Ability to reposition the cursor to the last row/column
NGClient	SVY-13254	Clear field is not detected on IE
NGClient	SVY-13306	objects with integer keys are not sent to the client properly
NGClient	SVY-13359	Calendar Component(both bootstrap and servoy-default) onDataChange not working with format (yyyy-MM-dd (or other format)) when dataprovider is null
NGClient	SVY-13341	Datepicker constantly change the date
NGClient, Server	SVY-13321	support for overriding the request.getContextPath() when deployed behind a proxy
Runtime	SVY-13406	allow databaseManager.getViewFoundSet(name) to retrieve a registered viewFoundSet
Runtime	SVY-13404	add a register parameter to databaseManager.getViewFoundSet() and deprecate databaseManager.registerViewFoundSet()
Runtime	SVY-13339	com.servoy.PersistIndexCache logger logs debug/trace info at the INFO level
Runtime	SVY-13196	Unable to call custom function with Query Builder using MS SQL
Runtime	SVY-13246	Strange Combobox Search Behavior
Server	SVY-13119	Log messages always with stacktrace
Server	SVY-13171	Server stops at random moments
Server	SVY-13345	check WAR deployment with ngclient (using really some stuff like http plugin) with undeploy
Server	SVY-13180	Query of a foundset created via QueryBuilder loses joins when sorted
Server	SVY-12842	Allow a subselect to be added to the joins of the query
SmartClient	SVY-13124	onDragOver is not triggering in smart client after navigation between records
WebClient	SVY-13165	Tabs from a tabPanel with a borderType (title) not displaying in Web Client
WebClient	SVY-12877	Application crashes after closing chrome tab and re-open it
WebClient	SVY-13440	Error when createing in memory dataset in onLoad of form
