## 2019.03.01

---

This release is for fixing the stale changes problem in the Developer when creating new stuff in a module and the main solution is not touched at all. It could be that the client wouldn't see these changes, until another flush or restart.

Components	Key	Summary
Developer	SVY-13557	Using the linux developer , when I try to modify the css position property I get an extra screen in background
Developer	SVY-13515	Please remove JSDoc from Eclipse update sites
Developer	SVY-13640	Typo cssPosition.heighth
Developer	SVY-13626	auto upgrade the licenses when using a servoy properties file for the war export
Developer	SVY-13641	Creating form with solutionmodel using cssPosition isn't working
NGClient	SVY-13517	Cannot tab to a checkbox to select it.
NGClient	SVY-13539	no dataChange event fired for fields based on form variables when the form's datasource is "readOnly"
NGClient	SVY-13669	Form doesn't render. Strange stack trace
NGClient	SVY-13651	incorrect sorting on in-memory datasources
NGClient	SVY-13676	Errors with list component
NGClient	SVY-13533	When having a datetime before 1940 on a linux env it will show a invalid date on ng
SmartClient	SVY-13579	using stored procedures in smart clients bombs out with a serialization problem
