

2019.06_RC

Components	Key	Summary
API, Runtime	SVY-13642	Add getTableNames() to server node of datasources
API, Runtime	SVY-13319	Saving data by bulk processes (API) give performance problems after a while
Developer	SVY-13421	Autofill to allow generic values.
Developer	SVY-13415	upgrade WPM to use Angular Latest
Developer	SVY-13414	Copy-Paste allow illegal drops
Developer	SVY-13408	Synchronize with DB Server Information at table level
Developer	SVY-13381	Log which components/services get exported when using the -crefs/srefs options (commandline WAR exporter)
Developer	SVY-13344	Where new solution wizard gets its contents from
Developer	SVY-13694	Exporting solution asks to save edited files after export is done. Better to ask before.
Developer	SVY-13624	Form Designer quickly be able to set the anchoring of selected elements
Developer	SVY-13626	auto upgrade the licenses when using a servoy properties file for the war export
Developer	SVY-13608	Downgrade arrow in web package manager
Developer	SVY-13609	Tab sequence in relation screen is wrong
Developer	SVY-13606	form method names not sorted in select method dialog
Developer	SVY-13567	Workingsets in new form wizard are not refreshed when I change the solution
Developer, Runtime	SVY-13566	MySQL should use different syntax for setting the catalog (database)
Developer	SVY-13535	send to back/front icons are reversed
Developer	SVY-13613	Add field wizard does not show bootstrap label component
Developer, Extensions, NGClient	SVY-13573	Be able to move a component to a different package..
Developer	SVY-13564	Make TAB-key loop through multi-value form/element property
Developer	SVY-13557	Using the linux developer , when I try to modify the css position property I get an extra screen in background
Developer	SVY-13556	globals scopes should not be created when adding a new module or solution
Developer	SVY-13507	allow servoyDeveloper.save(obj) to save a JSMedia
Developer	SVY-13493	ViewFoundSet table editor: check what is supported
Developer	SVY-13672	When selecting an element in the form editor, open all its containers in the outline
Developer	SVY-13670	missing war exporter command line options for server names, skip view import

Developer	SVY-13641	Creating form with solutionmodel using cssPosition isn't working
Developer	SVY-13640	Typo cssPosition.heigth
Developer	SVY-13520	Incorrect warning about non existing dataprovider when attaching a variable to a form component component
Developer	SVY-13519	Abstract forms should open in script editor when created using new form wizard
Developer	SVY-13515	Please remove JSDoc from Eclipse update sites
Developer	SVY-13513	Small spinner enhancement
Developer, Server	SVY-12815	Support for customizing translations (i18n) incomplete, leading to randomness/undetermined behavior
Developer	SVY-12725	View Foundset (readonly) in the developer
Developer, Extensions, NGClient	SVY-13572	Be able to deprecate components or services
Developer	SVY-13681	Irrelevant out of bounds warnings in CSS position forms
Developer	SVY-13782	incorrect warning on type mismatch with valuelists and global/form variables
Developer	SVY-13631	Synchronizing .dbi file differences does not give user feedback when error occurs
Developer, NGClient	SVY-13775	CSSPosition (changes) at runtime (code completion) and updating in the client
Developer, NGDesktop	SVY-13604	NGDesktop: Launch default executable from IDE
Developer	SVY-13711	Warning messages are shown about a missing dataprovider while dataprovider is set correctly
Developer, Extensions	SVY-13618	can not add elements to empty container when zoomed in
Developer	SVY-13766	add missing icons for the anchoring menu in css positioned forms
Developer, DLTK	SVY-13623	Having a string with escaped " in the begin and end isn't displayed at interactive console
Extensions	SVY-13231	[AG Grid] Expanding a group clears the existing selection(s) in other groups
Extensions	SVY-13607	KeyListener version 1.1.0 doesn't work
Extensions	SVY-13599	Textbox input type: search
Extensions, NGClient	SVY-13548	ability to check if capslock is on
Extensions	SVY-13545	textbox autocomplete = off
Extensions	SVY-13526	AG Grid - Column Header Alignment
Extensions, NGClient	SVY-13645	Ng-Grid: the grid sorting icons in header are 1-way bound only, not reflecting the actual foundset sort.
Extensions, NGClient	SVY-13644	I would like to change the iconStyleClass of a bootstrap button at runtime
Extensions, NGClient	SVY-13639	Ng-Grid: i would like to suppress the sideButtons "columns, filter", suppressSideButtons doesn't have any effect
Extensions	SVY-13633	NavBar Component's input group dataprovider doesn't update onAction

Extensions, NGClient	SVY-13594	Select2tokenizer isn't updating display values
Extensions	SVY-13737	NG Grid header height cannot be set to 0
Extensions, NGClient	SVY-13757	Unnecessary warning in NG Grid "You are setting the sort model..."
Extensions, NGClient	SVY-13717	Navbar sub-menu items do not appear if positioned to the left.
Extensions, NGClient	SVY-13688	listFormComponent isn't respecting the formIndex of a element
Extensions	SVY-13617	Powergrid sometimes hides columns when dataset is large
Extensions, NGClient	SVY-13679	Aggrid add option to focus on a specific cell
Extensions, NGClient	SVY-13742	NG: Grid request focus on the selected record
Extensions, NGClient	SVY-13661	Option for isoWeek is not working
NGClient	SVY-13384	AG-Grid Filter doesn't work for related dataproviders
Extensions, NGClient	SVY-13350	Button Group does not use tab sequences
Developer, NGClient	SVY-13445	putClientProperty with value undefined not converted to null
NGClient	SVY-13410	NGGrid doesn't work if there's no internet connection
Developer, Extensions, NGClient	SVY-13400	upgrade to bootstrap 3.4.1
NGClient	SVY-13401	upgrade to jquery ui to 1.12.1
Developer, NGClient	SVY-13398	form component elements do not have the attributes property
NGClient	SVY-13399	upgrade angular to the latest 1.7.x
NGClient	SVY-13325	Need a responsiveHeight property on the dbtreeview component
Extensions, NGClient	SVY-13659	Creating events through editor sets incorrect return value
NGClient	SVY-13656	History function does not show properties
NGClient	SVY-13539	no dataChange event fired for fields based on form variables when the form's datasource is "readOnly"
NGClient	SVY-13537	library version conflict
NGClient	SVY-13536	Branding title and icon
NGClient	SVY-13669	Form doesn't render. Strange stack trace
NGClient	SVY-13634	select2tokenizer
NGClient	SVY-13615	OnChange value in choiceGroup component is one value behind
NGClient, Runtime	SVY-13546	upgrade from joda time to java.time for the NGClient date parsing (timezones)
NGClient, Server	SVY-13527	pre/postImport handlers are being called twice when deploying WAR

NGClient, Runtime	SVY-13522	NG Client in different timezone causes date time issues
NGClient	SVY-13517	Cannot tab to a checkbox to select it.
NGClient	SVY-13498	Tab sequence
Extensions, NGClient	SVY-13709	ServoyExtra table will not resize unless browser window is resized
NGClient	SVY-13773	Select2tokenizer shows duplicate first time is shown
NGClient	SVY-13720	Tab sequence not respected in pop-up
NGClient	SVY-13589	Bootstrap tabpanel containing a servoy-default label with image is random displayed
NGClient	SVY-13702	HTML Area doesn't hide scrollbar when set to 'never'
NGClient	SVY-13697	[NG Grid] grid goes blank and freezes in group mode when expanding a group row that has no children
NGClient	SVY-13707	Expose JSRelation jointType constants also under QBJoin(s) (for access in Web Components)
NGClient	SVY-13689	ListFormComponent issues with handlers
NGClient	SVY-13698	[NG Grid] records missing with grouping icw related dataproviders (using the wrong joinTypes)
NGClient	SVY-13247	AG Grid - Icons
NGClient	SVY-13651	incorrect sorting on in-memory datasources
NGDesktop	SVY-13602	NGDesktop: Create Default Executable
Runtime	SVY-13438	Valuelist takes forever to load as a function
Runtime	SVY-13562	ViewFoundset getTable() implementation should generate a table that really reflects all the columns
Runtime	SVY-13577	add a few helper methods on JSUtils for string to byte and string to base64 conversons
Runtime	SVY-13598	License argument of the WarExporter should be in 3 parts
Runtime	SVY-13327	i18n API
Runtime	SVY-13308	relational valuelist does not work for combo box
Runtime	SVY-13693	Support QBJoins.add(relationName:String, joinType:int, alias:String)
Runtime	SVY-13405	Double inheritance of UI in responsive forms breaks form
NGMobile, Server	SVY-13370	Ship with minified/compress .js sources for all .js files that Servoy ships with out of the box
Server	SVY-13428	executeAsyncRequest not call the callback functions when running in a batchProcessor;
Server	SVY-13338	Upgrade shipped PostgreSQL driver
Server	SVY-13553	Servoy admin page sets stored browser credentials in plugin settings
Server	SVY-13667	Mssql QBFunction Ceil Error

SmartClient	SVY-13595	getEditedRecords() not recognizing changes in 7th and 8th decimal places
SmartClient	SVY-13579	using stored procedures in smart clients bombs out with a serialization problem
Developer, Testing	SVY-13365	application.output() statements written to the console twice in the UnitTest runner
WebClient	SVY-13722	Foundset not displaying in the UI
WebClient	SVY-13724	OnDataChange() events firing by themselves in an infinite loop
WebClient	SVY-13725	LoadRecords by dataset flashes twice in Web Client or freezes
