| Boolear | <pre>#pageBreakBefore When set, a page break will be inserted before each occurrence of a selected part.</pre>  |
| Number  | #partType<br>The type of this part.   |
| Boolear | #restartPageNumber<br>When set, page numbering will be restarted after each occurrence of a selected part.  |
| Boolear | #sinkWhenLast<br>When set, the last part on a page (such as a Trailing Grand Summary part) will<br>"sink" to the lowest part of the page when there is free space.  |

## **Property Details**

#### allowBreakAcrossPageBounds

When set, the remainder of a selected part that does not fit on the page currently being printed, will not be transported to the next page - it will break where the page ends and continue on the next page.

NOTE: Make sure to set this option when you are printing more than one page per record. **Returns** 

#### Boolean

background

The background color of the form part.

NOTE: When no background color has been set, the default background color will be determined by the Look and Feel (LAF) that has been selected in Application Preferences.

# Returns

## String

discardRemainderAfterBreak

When set, the remainder of a selected part that is broken due to the page ending will not be printed on the next page - it will be discarded.

#### Returns Boolean

# groupbyDataProviderIDs

For Leading Subsummary or Trailing Subsummary parts, one or more dataproviders can be added as Break (GroupBy) dataproviders. The Leading/Trailing Subsummary parts will be displayed once for each

resulted group of data.

#### Returns String

height

The height of a selected part; specified in pixels.

This height property is the lowerbound as its ending Y value (0 == top of the form).

#### Returns Number

Indumber

pageBreakAfterOccurrence

A page break will be inserted after a specified number of occurences of a selected part.

# Returns

Number

pageBreakBefore

When set, a page break will be inserted before each occurrence of a selected part.

# Returns

Boolean

partType

The type of this part.

#### Returns Number

restartPageNumber

When set, page numbering will be restarted after each occurrence of a selected part.

# Returns

Boolean

sinkWhenLast

When set, the last part on a page (such as a Trailing Grand Summary part) will "sink" to the lowest part of the page when there is free space.

Returns Boolean
