Smart Client Settings

The Smart Client Settings are applicable to the Servoy Smart Client only.

servoy.clientDesktopShortcutCreation

Enable/Disable desktop shortcut creation question

pushLnfToMac

Enable pushing Look and Feel to Mac (WARNING: not all Look and Feels work on the Mac)

useSystemPrintDialog

Use the system print dialogs on the clients or the Java one.

servoy.allowExistingClientActivate

Allows for client reuse/activation when a second client url is used; it is activated when requesting the same solution with different method or arguments.
