

Getting Ready to Install

Once system requirements are in place, users can use the all-in-one installer to install the Servoy Developer, which installs the Developer IDE. This same installer is also used to install the Servoy Application Server used to deploy Servoy solutions (see [Deployment Guide](#)).

1. Open the Servoy installer file. The welcome message will appear, displaying the version/release number to be installed.
2. Click **Next**.
3. Review and accept the license agreement, then click **Next**.
4. Select the installation you wish to perform (see below), then click **Next**.
