Getting Ready to Install

Once system requirements are in place, users can use the all-in-one installer to install the Servoy Developer, which installs the Developer IDE. This same installer is also used to install the Servoy Application Server used to deploy Servoy solutions (see Deployment Guide).

- 1. Open the Servoy installer file. The welcome message will appear, displaying the version/release number to be installed.
- 2. Click Next.
- 3. Review and accept the license agreement, then click **Next**.
- 4. Select the installation you wish to perform (see below), then click Next.

00	Servoy All-In-One installer	
servoy	Next Generation Platform	Select Servoy installation option
 The Servoy All-In-One installer can be used to either install the Servoy Developer IDE or the Servoy Application Server. Select the desired option and click "Next". Servoy Developer Installs the servoy developer IDE. The Servoy Developer IDE is used to create cross platform, cross device and database agnostic solutions. Servoy Application Server Installs the Servoy Application Server, to be used for test, demo or production purposes. The Servoy Application Server is used to deploy Solutions developed with the Servoy Developer IDE.
