Servoy Admin page

The Servoy Admin page is a browser-based interface to manage a Servoy Application Server.

Among other things, it allows the server administrator to:

- Restart and stop the Servoy Application Server
- Manage Servoy settings
- Manage Network settings
- Manage Database Server connections
- Manage connected clients
- Manage Solutions
- View the Server log file

The Servoy Admin page can be accessed through a browser from the following URL: {serverUrl}/servoy-admin

For an indepth overview of all configuration options on the Servoy admin pages, see Configuring the server.
For further information on using the Servoy Admin page, see Operating the server.
