

Popup

Method Summary

CheckBox	<code>#addCheckBox()</code> Add a checkbox.
CheckBox	<code>#addCheckBox(index)</code> Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>#addCheckBox(name)</code> Add a checkbox with given name.
CheckBox	<code>#addCheckBox(name, feedback_item)</code> Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>#addCheckBox(name, feedback_item, icon)</code> Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>#addCheckBox(name, feedback_item, icon, mnemonic)</code> Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>#addCheckBox(name, feedback_item, icon, mnemonic, enabled)</code> Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>#addCheckBox(name, feedback_item, icon, mnemonic, enabled, align)</code> Add a checkbox at the selected index (starting at 0) or at the end.
Menu	<code>#addMenu()</code> Add a submenu at the end.
Menu	<code>#addMenu(index)</code> Add a submenu at the selected index (starting at 0).
Menu	<code>#addMenu(name)</code> Add a submenu with given name.
MenuItem	<code>#addMenuItem()</code> Add a menu item.
MenuItem	<code>#addMenuItem(index)</code> Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>#addMenuItem(name)</code> Add a menu item with given name.
MenuItem	<code>#addMenuItem(name, feedback_item)</code> Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>#addMenuItem(name, feedback_item, icon)</code> Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>#addMenuItem(name, feedback_item, icon, mnemonic)</code> Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>#addMenuItem(name, feedback_item, icon, mnemonic, enabled)</code> Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>#addMenuItem(name, feedback_item, icon, mnemonic, enabled, align)</code> Add a menu item at the selected index (starting at 0) or at the end.
RadioButton	<code>#addRadioButton()</code> Add a radio button.
RadioButton	<code>#addRadioButton(index)</code> Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>#addRadioButton(name)</code> Add a radio button with given name.
RadioButton	<code>#addRadioButton(name, feedback_item)</code> Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>#addRadioButton(name, feedback_item, icon)</code> Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>#addRadioButton(name, feedback_item, icon, mnemonic)</code> Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>#addRadioButton(name, feedback_item, icon, mnemonic, enabled)</code> Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>#addRadioButton(name, feedback_item, icon, mnemonic, enabled, align)</code> Add a radiobutton at the selected index (starting at 0) or at the end.
void	<code>#addRadioGroup()</code> Add a radiogroup for radiobuttons.
void	<code>#addSeparator()</code> Add the separator at the selected index (starting at 0) or at the end (empty).
void	<code>#addSeparator(index)</code> Add the separator at the selected index (starting at 0) or at the end (empty).
CheckBox	<code>#getCheckBox(index)</code> Get the checkbox at the selected index (starting at 0).
Object	<code>#getClientProperty(key)</code> Gets the specified client property for the element based on a key.
MenuItem	<code>#getItem(index)</code> Get the item at the selected index (starting at 0).

Number	<code>#getItemCount()</code> Get the number of items in the menu.
Number	<code>#getMenuItemIndexByText(text)</code> Retrieve the index of the item by text.
Menu	<code>#getSubMenu(index)</code> Get the submenu at the selected index (starting at 0).
RadioButton	<code>#getRadioButton(index)</code> Get the radiobutton at the selected index (starting at 0).
void	<code>#putClientProperty(key, value)</code> Sets the value for the specified element client property key.
void	<code>#removeAllItems()</code> Remove all items from the menu.
void	<code>#removeItem(index)</code> Remove the item(s) at the selected index/indices.
void	<code>#show()</code> Show the popup at the mouse coordinates (Smart client only).
void	<code>#show(component)</code> Show the popup above the specified element.
void	<code>#show(component, x, y)</code> Show the popup above the specified element, adding x an y values relative to the element.
void	<code>#show(x, y)</code> Show the popup at x an y coordinates.

Method Details

addCheckBox
CheckBox addCheckBox()

Add a checkbox.

Returns

CheckBox – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox
CheckBox addCheckBox(index)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

{Number} index – the index at which to add the checkbox

Returns

CheckBox – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox

CheckBox **addCheckBox**(name)

Add a checkbox with given name.

Parameters

{String} name – the checkbox text

Returns

CheckBox – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox

CheckBox addCheckBox(name, feedback_item)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

{String} name – the checkbox text

{Object} feedback_item – this can be either a method or an array representing a submenu

Returns

CheckBox – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);
// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox

CheckBox addCheckBox(name, feedback_item, icon)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

{String} name – the checkbox text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the checkbox icon (can be an image URL or the image content byte array)

Returns

CheckBox – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox

CheckBox **addCheckBox**(name, feedback_item, icon, mnemonic)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

{String} name – the checkbox text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the checkbox icon (can be an image URL or the image content byte array)

{String} mnemonic – the checkbox mnemonic

Returns

CheckBox – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox

[CheckBox](#) **addCheckBox**(name, feedback_item, icon, mnemonic, enabled)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

{String} name – the checkbox text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the checkbox icon (can be an image URL or the image content byte array)

{String} mnemonic – the checkbox mnemonic

{Boolean} enabled – the enabled state of the checkbox

Returns

[CheckBox](#) – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox

[CheckBox](#) **addCheckBox**(name, feedback_item, icon, mnemonic, enabled, align)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

{[String](#)} name – the checkbox text

{[Object](#)} feedback_item – this can be either a method or an array representing a submenu

{[Object](#)} icon – the checkbox icon (can be an image URL or the image content byte array)

{[String](#)} mnemonic – the checkbox mnemonic

{[Boolean](#)} enabled – the enabled state of the checkbox

{[Number](#)} align – the alignment type

Returns

[CheckBox](#) – checkbox

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addMenu

Menu **addMenu()**

Add a submenu at the end.

Returns

Menu – the submenu

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add a first submenu
var submenu1 = menu.addMenu("submenu 1");
submenu1.addMenuItem("sub item 1 - 1", feedback_item);
// add a submenu as child of the first submenu
var submenu1_2 = submenu1.addMenu("submenu 1 - 2");
submenu1_2.addMenuItem("sub item 1 - 2 - 1", feedback_item);
// add another submenu as a child of the first submenu
var submenu1_3 = submenu1.addMenu("submenu 1 - 3");
submenu1_3.addMenuItem("sub item 1 - 3 - 1", feedback_item);
// add a submenu to the second submenu of the first submenu
var submenu1_3_2 = submenu1_2.addMenu("submenu 1 - 2 - 2");
submenu1_3_2.addMenuItem("sub item 1 - 2 - 2 - 1", feedback_item);
// add a submenu directly to the menu, at the first position
var submenu0 = menu.addMenu(0);
submenu0.text = "submenu 0";
submenu0.addMenuItem("sub item 0 - 1", feedback_item);
```

addMenu

Menu **addMenu(index)**

Add a submenu at the selected index (starting at 0).

Parameters

{Number} index – the index at which to add the submenu

Returns**Menu** – the submenu**Sample**

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add a first submenu
var submenu1 = menu.addMenu("submenu 1");
submenu1.addMenuItem("sub item 1 - 1", feedback_item);
// add a submenu as child of the first submenu
var submenu1_2 = submenu1.addMenu("submenu 1 - 2");
submenu1_2.addMenuItem("sub item 1 - 2 - 1", feedback_item);
// add another submenu as a child of the first submenu
var submenu1_3 = submenu1.addMenu("submenu 1 - 3");
submenu1_3.addMenuItem("sub item 1 - 3 - 1", feedback_item);
// add a submenu to the second submenu of the first submenu
var submenu1_3_2 = submenu1_2.addMenu("submenu 1 - 2 - 2");
submenu1_3_2.addMenuItem("sub item 1 - 2 - 2 - 1", feedback_item);
// add a submenu directly to the menu, at the first position
var submenu0 = menu.addMenu(0);
submenu0.text = "submenu 0";
submenu0.addMenuItem("sub item 0 - 1", feedback_item);
```

addMenu**Menu** **addMenu(name)**

Add a submenu with given name.

Parameters{[String](#)} name – the text of the submenu**Returns****Menu** – the submenu**Sample**

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add a first submenu
var submenu1 = menu.addMenu("submenu 1");
submenu1.addMenuItem("sub item 1 - 1", feedback_item);
// add a submenu as child of the first submenu
var submenu1_2 = submenu1.addMenu("submenu 1 - 2");
submenu1_2.addMenuItem("sub item 1 - 2 - 1", feedback_item);
// add another submenu as a child of the first submenu
var submenu1_3 = submenu1.addMenu("submenu 1 - 3");
submenu1_3.addMenuItem("sub item 1 - 3 - 1", feedback_item);
// add a submenu to the second submenu of the first submenu
var submenu1_3_2 = submenu1_2.addMenu("submenu 1 - 2 - 2");
submenu1_3_2.addMenuItem("sub item 1 - 2 - 2 - 1", feedback_item);
// add a submenu directly to the menu, at the first position
var submenu0 = menu.addMenu(0);
submenu0.text = "submenu 0";
submenu0.addMenuItem("sub item 0 - 1", feedback_item);
```

addMenuItem**MenuItem** **addMenuItem()**

Add a menu item.

Returns**MenuItem** – menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);

// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addItem

MenuItem **addItem**(index)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

{Number} index – the index at which to add the menu item

Returns

MenuItem – menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);

// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addMenuItem
MenuItem addMenuItem(name)
Add a menu item with given name.
Parameters
`{String}` name – the menu item text
Returns
`MenuItem` – menu item
Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT ')' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addMenuItem
MenuItem addMenuItem(name, feedback_item)
Add a menu item at the selected index (starting at 0) or at the end.
Parameters
`{String}` name – the menu item text
`{Object}` feedback_item – this can be either a method or an array representing a submenu
Returns
`MenuItem` – menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addMenuItem("item", feedback_item);
// add an item with an icon
menu.addMenuItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addMenuItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addMenuItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addMenuItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addMenuItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addMenuItem

[MenuItem](#) **addMenuItem**(name, feedback_item, icon)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

[String](#) name – the menu item text

[Object](#) feedback_item – this can be either a method or an array representing a submenu

[Object](#) icon – the menu item icon (can be an image URL or the image content byte array)

Returns

[MenuItem](#) – menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addMenuItem("item", feedback_item);
// add an item with an icon
menu.addMenuItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addMenuItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addMenuItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addMenuItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addMenuItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addMenuItem

MenuItem **addMenuItem**(name, feedback_item, icon, mnemonic)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

{String} name – the menu item text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the menu item icon (can be an image URL or the image content byte array)

{String} mnemonic – the menu item mnemonic

Returns

MenuItem – menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addMenuItem("item", feedback_item);
// add an item with an icon
menu.addMenuItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addMenuItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addMenuItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addMenuItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addMenuItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addMenuItem

MenuItem **addMenuItem**(name, feedback_item, icon, mnemonic, enabled)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

{**String**} name – the menu item text

{**Object**} feedback_item – this can be either a method or an array representing a submenu

{**Object**} icon – the menu item icon (can be an image URL or the image content byte array)

{**String**} mnemonic – the menu item mnemonic

{**Boolean**} enabled – the enabled state of the menu item

Returns

MenuItem – menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addMenuItem("item", feedback_item);
// add an item with an icon
menu.addMenuItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addMenuItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addMenuItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addMenuItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addMenuItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addMenuItem

MenuItem **addMenuItem**(name, feedback_item, icon, mnemonic, enabled, align)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

{String} name – the menu item text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the menu item icon (can be an image URL or the image content byte array)

{String} mnemonic – the menu item mnemonic

{Boolean} enabled – the enabled state of the menu item

{Number} align – the alignment type

Returns

MenuItem – menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addRadioButton

[RadioButton](#) **addRadioButton()**

Add a radio button.

Returns

[RadioButton](#) – a radio button menu item

Sample

addRadioButton

[RadioButton](#) **addRadioButton(index)**

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

{Number} index – the index at which to add the radio button

Returns

[RadioButton](#) – a radio button menu item

Sample

addRadioButton

[RadioButton](#) **addRadioButton(name)**

Add a radio button with given name.

Parameters

{String} name – the radio button text

Returns

[RadioButton](#) – a radio button menu item

Sample

addRadioButton

[RadioButton](#) **addRadioButton(name, feedback_item)**

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

{String} name – the radio button text

{Object} feedback_item – this can be either a method or an array representing a submenu

Returns

[RadioButton](#) – a radio button menu item

Sample

addRadioButton

RadioButton addRadioButton(name, feedback_item, icon)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

{String} name – the radio button text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the radio button icon (can be an image URL or the image content byte array)

Returns

RadioButton – a radio button menu item

Sample

```
addRadioButton
```

RadioButton addRadioButton(name, feedback_item, icon, mnemonic)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

{String} name – the radio button text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the radio button icon (can be an image URL or the image content byte array)

{String} mnemonic – the radio button mnemonic

Returns

RadioButton – a radio button menu item

Sample

```
addRadioButton
```

RadioButton addRadioButton(name, feedback_item, icon, mnemonic, enabled)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

{String} name – the radio button text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the radio button icon (can be an image URL or the image content byte array)

{String} mnemonic – the radio button mnemonic

{Boolean} enabled – the enabled state of radio button

Returns

RadioButton – a radio button menu item

Sample

```
addRadioButton
```

RadioButton addRadioButton(name, feedback_item, icon, mnemonic, enabled, align)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

{String} name – the radio button text

{Object} feedback_item – this can be either a method or an array representing a submenu

{Object} icon – the radio button icon (can be an image URL or the image content byte array)

{String} mnemonic – the radio button mnemonic

{Boolean} enabled – the enabled state of radio button

{Number} align – the alignment type

Returns

RadioButton – a radio button menu item

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the radiobutton will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addRadioButton("radio", feedback_radiobutton);
// add a radiobutton with an icon
menu.addRadioButton("radio with icon", feedback_radiobutton, "media:///yourimage.gif");

// add a new radiobutton group
// a group will 'bind' all added radiobuttons after the group together
// as a result checking one item will uncheck the other
// if no group is added, a group is created automatically when the first radiobutton is added to the menu
// so in this case we will have two groups, one with the radiobuttons added until now and one with the ones
added from now on
menu.addRadioGroup();

// add a radiobutton with a mnemonic
menu.addRadioButton("radio with mnemonic", feedback_radiobutton, "media:///yourimage.gif", "i");
// add a disabled radiobutton
menu.addRadioButton("disabled radio", feedback_radiobutton, "media:///yourimage.gif", "d", false);
// add a radiobutton with text aligned to the right
menu.addRadioButton("align right", feedback_radiobutton, null, null, true, SM_ALIGNMENT.RIGHT);
// add a radiobutton at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);
```

addRadioGroup

void addRadioGroup()

Add a radiogroup for radiobuttons. A radiogroup groups together all radiobuttons that are added after the group is added. From all radiobuttons that belong to the same radiogroup only one can be checked at a time.

If no radiogroup is added, one is created automatically when the first radiobutton is added.

Returns

void

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the radiobutton will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addRadioButton("radio", feedback_radiobutton);
// add a radiobutton with an icon
menu.addRadioButton("radio with icon", feedback_radiobutton, "media:///yourimage.gif");

// add a new radiobutton group
// a group will 'bind' all added radiobuttons after the group together
// as a result checking one item will uncheck the other
// if no group is added, a group is created automatically when the first radiobutton is added to the menu
// so in this case we will have two groups, one with the radiobuttons added until now and one with the ones
added from now on
menu.addRadioGroup();

// add a radiobutton with a mnemonic
menu.addRadioButton("radio with mnemonic", feedback_radiobutton, "media:///yourimage.gif", "i");
// add a disabled radiobutton
menu.addRadioButton("disabled radio", feedback_radiobutton, "media:///yourimage.gif", "d", false);
// add a radiobutton with text aligned to the right
menu.addRadioButton("align right", feedback_radiobutton, null, null, true, SM_ALIGNMENT.RIGHT);
// add a radiobutton at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);
```

addSeparator

void addSeparator()

Add the separator at the selected index (starting at 0) or at the end (empty).

Returns

void

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add an item and a checkbox
menu.addMenuItem("item", feedback_item);
menu.addCheckBox("checkbox", feedback_checkbox);
// add a separator
menu.addSeparator();
// add a radiobutton. it will be separated from the rest of the control by the separator
menu.addRadioButton("radio", feedback_radiobutton);
// add another separator between the item and the checkbox
menu.addSeparator(1);
```

addSeparator

void addSeparator(index)

Add the separator at the selected index (starting at 0) or at the end (empty).

Parameters

{Number} index – the index at which to add the separator

Returns

void

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add an item and a checkbox
menu.addMenuItem("item", feedback_item);
menu.addCheckBox("checkbox", feedback_checkbox);
// add a separator
menu.addSeparator();
// add a radiobutton. it will be separated from the rest of the control by the separator
menu.addRadioButton("radio", feedback_radiobutton);
// add another separator between the item and the checkbox
menu.addSeparator(1);
```

getCheckBox

[CheckBox](#) **getCheckBox**(index)

Get the checkbox at the selected index (starting at 0).

Parameters

{Number} index

Returns[CheckBox](#)

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
} else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}
```

getClientProperty

Object **getClientProperty**(key)

Gets the specified client property for the element based on a key.

Parameters

{Object} key

Returns

Object

Sample

```
// NOTE: Depending on the operating system, a user interface property name may be available.  
// add a new menu to the menubar  
var menubar = plugins.window.getMenuBar();  
var menu = menubar.addMenu();  
menu.text = "New Menu";  
// alternatively create a popup menu  
//var menu = plugins.window.createPopupMenu();  
  
// add an item to the menu  
menu.addMenuItem("item", feedback_item);  
  
// set the tooltip of the menu via client properties  
// keep the original tooltip in a form or global variable  
originalTooltip = menu.getClientProperty("ToolTipText");  
menu.putClientProperty("ToolTipText", "changed tooltip");  
  
// later restore the original tooltip from the variable  
//var menubar = plugins.window.getMenuBar();  
//var menu = menubar.getMenu(menubar getMenuCount()-1);  
//menu.putClientProperty("ToolTipText", originalTooltip);
```

getItem

[Menutem](#) **getitem**(index)

Get the item at the selected index (starting at 0).

Parameters

[Number](#) index

Returns

[Menutem](#)

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
} else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}
```

getItemCount

Number **getItemCount()**

Get the number of items in the menu.

Returns

Number

Sample

```
// REMARK: indexes start at 0, disabled items, non visible items and separators are counted also
// REMARK: this is especially important when getting items by the index
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a checkbox
menu.addCheckBox("check", feedback_checkbox);
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

// remove the last item
menu.removeItem(menu.getItemCount() - 1);
```

getItemIndexByText

Number **getItemIndexByText**(text)

Retrieve the index of the item by text.

Parameters

{String} text

Returns

Number

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a checkbox
menu.addCheckBox("check", feedback_checkbox);
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

// find the index of the checkbox
var idx = menu.getItemIndexByText("check");
// remove the checkbox by its index
menu.removeItem(idx);
// remove both radiobuttons by their indices
menu.removeItem([0, 1]);
// remove all remaining entries
menu.removeAllItems();
// add back an item
menu.addMenuItem("new item", feedback_item);
```

getMenu

Menu **getMenu**(index)

Get the submenu at the selected index (starting at 0).

Parameters

{Number} index

Returns

[Menu](#)

[Sample](#)

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
}
else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}
```

[getRadioButton](#)

RadioButton **getRadioButton**(index)

Get the radiobutton at the selected index (starting at 0).

Parameters

[{Number}](#) index

Returns

[RadioButton](#)

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
} else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}
```

putClientProperty

void **putClientProperty**(key, value)

Sets the value for the specified element client property key.

Parameters

{Object} key

{Object} value

Returns

void

Sample

```
// NOTE: Depending on the operating system, a user interface property name may be available.  
// add a new menu to the menubar  
var menubar = plugins.window.getMenuBar();  
var menu = menubar.addMenu();  
menu.text = "New Menu";  
// alternatively create a popup menu  
//var menu = plugins.window.createPopupMenu();  
  
// add an item to the menu  
menu.addMenuItem("item", feedback_item);  
  
// set the tooltip of the menu via client properties  
// keep the original tooltip in a form or global variable  
originalTooltip = menu.getClientProperty("ToolTipText");  
menu.putClientProperty("ToolTipText", "changed tooltip");  
  
// later restore the original tooltip from the variable  
//var menubar = plugins.window.getMenuBar();  
//var menu = menubar.getMenu(menubar getMenuCount()-1);  
//menu.putClientProperty("ToolTipText", originalTooltip);
```

removeAllItems

void removeAllItems()

Remove all items from the menu.

Returns

void

Sample

```
// add a new menu to the menubar  
var menubar = plugins.window.getMenuBar();  
var menu = menubar.addMenu();  
menu.text = "New Menu";  
// alternatively create a popup menu  
//var menu = plugins.window.createPopupMenu();  
  
// add two radio buttons  
menu.addRadioButton("radio one", feedback_radiobutton);  
menu.addRadioButton("radio two", feedback_radiobutton);  
// add a checkbox  
menu.addCheckBox("check", feedback_checkbox);  
// add a menu item  
menu.addMenuItem("item", feedback_item);  
// add another menu item  
menu.addMenuItem("item 2", feedback_item);  
  
// find the index of the checkbox  
var idx = menu.getItemIndexByText("check");  
// remove the checkbox by its index  
menu.removeItem(idx);  
// remove both radio buttons by their indices  
menu.removeItem([0, 1]);  
// remove all remaining entries  
menu.removeAllItems();  
// add back an item  
menu.addMenuItem("new item", feedback_item);
```

removeItem

void removeItem(index)

Remove the item(s) at the selected index/indices.

Parameters

{Object[]} index – array of one or more indexes corresponding to items to remove

Returns

void

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a checkbox
menu.addCheckBox("check", feedback_checkbox);
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

// find the index of the checkbox
var idx = menu.getItemIndexByText("check");
// remove the checkbox by its index
menu.removeItem(idx);
// remove both radiobuttons by their indices
menu.removeItem([0, 1]);
// remove all remaining entries
menu.removeAllItems();
// add back an item
menu.addMenuItem("new item", feedback_item);
```

show

void **show()**

Show the popup at the mouse coordinates (Smart client only).

Returns

void

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```

show

void **show(component)**

Show the popup above the specified element.

Parameters

{RuntimeComponent} component

Returns

void

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```

show

void **show**(component, x, y)

Show the popup above the specified element, adding x and y values relative to the element.

Parameters

{RuntimeComponent} component

{Number} x

{Number} y

Returns

void

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```

show

void **show**(x, y)

Show the popup at x and y coordinates.

Parameters

{Number} x

{Number} y

Returns

void

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```
