Property Summary

Boolean	allowBreakAcrossPageBounds	When set, the remainder of a selected part that does not fit on the page currently being printed, will not be transported to the next page - it will break where the page ends and continue on the next page.
String	background	The background color of the form part.
Boolean	discardRemainderAfterBreak	When set, the remainder of a selected part that is broken due to the page ending will not be printed on the next page - it will be discarded.
String	groupbyDataProviderIDs	For Leading Subsummary or Trailing Subsummary parts, one or more dataproviders can be added as Break (GroupBy) dataproviders.
Number	height	The height of a selected part; specified in pixels.
Number	pageBreakAfterOccurrence	A page break will be inserted after a specified number of occurences of a selected part.
Boolean	pageBreakBefore	When set, a page break will be inserted before each occurrence of a selected part.
Number	partType	The type of this part.
Boolean	restartPageNumber	When set, page numbering will be restarted after each occurrence of a selected part.
Boolean	sinkWhenLast	When set, the last part on a page (such as a Trailing Grand Summary part) will "sink" to the lowest part of the page when there is free space.
String	styleClass	The Cascading Style Sheet (CSS) class name applied to the part.

Property Details

allowBreakAcrossPageBounds

```
When set, the remainder of a selected part that does not fit on the page currently
being printed, will not be transported to the next page - it will break where the page
ends and continue on the next page.

NOTE: Make sure to set this option when you are printing more than one page per record.
```

Returns

Boolean

Supported Clients

SmartClient,WebClient

Sample

background

```
The background color of the form part.

NOTE: When no background color has been set, the default background
color will be determined by the Look and Feel (LAF) that has been selected
in Application Preferences.
```

Returns

String

Sample

discardRemainderAfterBreak

```
When set, the remainder of a selected part that is broken due to the page
ending will not be printed on the next page - it will be discarded.
```

Returns

Boolean

Supported Clients

SmartClient,WebClient

Sample

_____

groupbyDataProviderIDs

For Leading Subsummary or Trailing Subsummary parts, one or more
dataproviders can be added as Break (GroupBy) dataproviders. The
Leading/Trailing Subsummary parts will be displayed once for each
resulted group of data.

Returns

[String]

Supported Clients

Sample

_____

height

The height of a selected part; specified in pixels.

This height property is the lowerbound as its ending Y value (0 == top of the form).

Returns

[Number]

Supported Clients

SmartClient,WebClient,NGClient

Sample

_____

pageBreakAfterOccurrence

A page break will be inserted after a specified number of occurences of a selected part.

Returns

[Number]

Supported Clients

SmartClient,WebClient

Sample

_____

pageBreakBefore

When set, a page break will be inserted before each occurrence of a selected part.

Returns

[Boolean]

Supported Clients

SmartClient,WebClient

Sample

_____

partType

The type of this part.

Returns

[Number]

Supported Clients

SmartClient,WebClient,NGClient

Sample

_____

restartPageNumber

When set, page numbering will be restarted after each occurrence of a selected part.

Returns

    Boolean
