
NG Client Settings

`servoy.ngclient.testingMode`

Testing support property for generating the data-svy-name attribute on forms and form elements.

`servoy.ngclient.enableWebResourceOptimizer`

Enable grouping of resource files, like js and css, to reduce the number of page requests

`sablo.window.timeout.secs`

The number of seconds after which a disconnected client will be cleaned up. Within this time a client can be reconnected. Default 60.
