

Variable

Property Summery

[String](#) [#defaultValue](#)
The default value of the variable.

[String](#) [#name](#)
The name of the variable.

[Number](#) [#variableType](#)
The type of the variable.

Property Details

[defaultValue](#)
The default value of the variable.

It is interpreted as a JS expression.

For INTEGER variables it can be an integer constant, like 10 for example.
For NUMBER variables it can be a real constant, like 22.41. For DATETIME variables it can be "now", or a JS expression like "new Date()". For TEXT variables it can be any string surrounded with quotes, like 'some text'.

Returns

[String](#)
[name](#)
The name of the variable.

Returns

[String](#)
[variableType](#)
The type of the variable. Can be one of: TEXT, INTEGER, NUMBER, DATETIME or MEDIA.

Returns

[Number](#)
