

# Using JQueryMobile JavaScript Library

## JQueryMobile Library

Servoy mobile is using JQueryMobile especially for all GUI, this means its default available and ready to use and access from servoy script methods.

See [official API docs](#), for how to utilize the library. The widgets part might be of most use inside Servoy Mobile.

## Examples

### Displaying a Loading indicator

```
//To show a loading indicator
$.mobile.loading('show', {text: 'Hello World', textVisible: true});

//to hide it again
$.mobile.loading('hide')
```

### Change the default page transitions

```
$.mobile.defaultPageTransition = 'slide'
```
