

Popup

 Apr 10, 2024 02:39

Supported Clients

SmartClient WebClient NGClient

Property Summary

String `cssClass` Get/set the css class of the popup menu.

Methods Summary

CheckBox	<code>addCheckBox()</code>	Add a checkbox.
CheckBox	<code>addCheckBox(index)</code>	Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>addCheckBox(name)</code>	Add a checkbox with given name.
CheckBox	<code>addCheckBox(name, feedback_item)</code>	Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>addCheckBox(name, feedback_item, icon)</code>	Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>addCheckBox(name, feedback_item, icon, mnemonic)</code>	Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>addCheckBox(name, feedback_item, icon, mnemonic, enabled)</code>	Add a checkbox at the selected index (starting at 0) or at the end.
CheckBox	<code>addCheckBox(name, feedback_item, icon, mnemonic, enabled, align)</code>	Add a checkbox at the selected index (starting at 0) or at the end.
Menu	<code>addMenu()</code>	Add a submenu at the end.
Menu	<code>addMenu(index)</code>	Add a submenu at the selected index (starting at 0).
Menu	<code>addMenu(name)</code>	Add a submenu with given name.
MenuItem	<code>addMenuItem()</code>	Add a menu item.
MenuItem	<code>addMenuItem(index)</code>	Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>addMenuItem(name)</code>	Add a menu item with given name.
MenuItem	<code>addMenuItem(name, feedback_item)</code>	Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>addMenuItem(name, feedback_item, icon)</code>	Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>addMenuItem(name, feedback_item, icon, mnemonic)</code>	Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>addMenuItem(name, feedback_item, icon, mnemonic, enabled)</code>	Add a menu item at the selected index (starting at 0) or at the end.
MenuItem	<code>addMenuItem(name, feedback_item, icon, mnemonic, enabled, align)</code>	Add a menu item at the selected index (starting at 0) or at the end.
RadioButton	<code>addRadioButton()</code>	Add a radio button.
RadioButton	<code>addRadioButton(index)</code>	Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>addRadioButton(name)</code>	Add a radio button with given name.
RadioButton	<code>addRadioButton(name, feedback_item)</code>	Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>addRadioButton(name, feedback_item, icon)</code>	Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>addRadioButton(name, feedback_item, icon, mnemonic)</code>	Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>addRadioButton(name, feedback_item, icon, mnemonic, enabled)</code>	Add a radiobutton at the selected index (starting at 0) or at the end.
RadioButton	<code>addRadioButton(name, feedback_item, icon, mnemonic, enabled, align)</code>	Add a radiobutton at the selected index (starting at 0) or at the end.
void	<code>addRadioGroup()</code>	Add a radiogroup for radiobuttons.
void	<code>addSeparator()</code>	Add the separator at the selected index (starting at 0) or at the end (empty).
void	<code>addSeparator(index)</code>	Add the separator at the selected index (starting at 0) or at the end (empty).
CheckBox	<code>getCheckBox(index)</code>	Get the checkbox at the selected index (starting at 0).
Object	<code>getClientProperty(key)</code>	Gets the specified client property for the element based on a key.
Object	<code>getItem(index)</code>	Get the item at the selected index (starting at 0).
Number	<code>getItemCount()</code>	Get the number of items in the menu.
Number	<code>getItemIndexByText(text)</code>	Retrieve the index of the item by text.
Menu	<code>getMenu(index)</code>	Get the submenu at the selected index (starting at 0).
RadioButton	<code>getRadioButton(index)</code>	Get the radiobutton at the selected index (starting at 0).
void	<code>putClientProperty(key, value)</code>	Sets the value for the specified element client property key.
void	<code>removeAllItems()</code>	Remove all items from the menu.
void	<code>removeItem(index)</code>	Remove the item(s) at the selected index/indices.
void	<code>show()</code>	Show the popup at the mouse coordinates (Smart client only).
void	<code>show(jsEvent)</code>	Show the popup based on JSEvent information.
void	<code>show(component)</code>	Show the popup below the specified element.
void	<code>show(component, positionTop)</code>	Show the popup menu according to the positionTop parameter.
void	<code>show(component, x, y)</code>	Show the popup below to the specified element, adding x an y values relative to the element.

void	show(component, x, y, positionTop)	Show the popup menu according to the positionTop, x, y parameters.
void	show(x, y)	Show the popup at x an y coordinates.

Property Details

cssClass

Get/set the css class of the popup menu. This only works in NGClient

Returns

[String](#)

Supported Clients

NGClient

Sample

Methods Details

addCheckBox()

Add a checkbox.

Returns

[CheckBox](#) checkbox

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);
// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addCheckBox("checkbox with icon", feedback_checkbox, pic_bytes);
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox(index)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

[Number](#) index the index at which to add the checkbox

Returns

[CheckBox](#) checkbox

Supported Clients

SmartClient,WebClient,NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);
// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addCheckBox("checkbox with icon", feedback_checkbox, pic_bytes);
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox(name)

Add a checkbox with given name.

Parameters[String](#) name the checkbox text; this can be also html if enclosed between html tags**Returns**[CheckBox](#) checkbox**Supported Clients**

SmartClient,WebClient,NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);
// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addCheckBox("checkbox with icon", feedback_checkbox, pic_bytes);
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);

```

addCheckBox(name, feedback_item)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

String name the checkbox text; this can be also html if enclosed between html tags
Function feedback_item the feedback function

Returns

CheckBox checkbox

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);
// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");

// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);

```

addCheckBox(name, feedback_item, icon)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

String name the checkbox text; this can be also html if enclosed between html tags
Function feedback_item the feedback function
Object icon the checkbox icon (can be an image URL or the image content byte array)

Returns

CheckBox checkbox

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position

// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);
// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addCheckBox("checkbox with icon", feedback_checkbox, pic_bytes);
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);

```

addCheckBox(name, feedback_item, icon, mnemonic)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

String	name	the checkbox text; this can be also html if enclosed between html tags
Function	feedback_item	the feedback function
Object	icon	the checkbox icon (can be an image URL or the image content byte array)
String	mnemonic	the checkbox mnemonic

Returns

CheckBox checkbox

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addCheckBox("checkbox with icon", feedback_checkbox, pic_bytes);
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addCheckBox(name, feedback_item, icon, mnemonic, enabled)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

String name	the checkbox text; this can be also html if enclosed between html tags
Function feedback_item	the feedback function
Object icon	the checkbox icon (can be an image URL or the image content byte array)
String mnemonic	the checkbox mnemonic
Boolean enabled	the enabled state of the checkbox

Returns

CheckBox checkbox

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method

// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addCheckBox("checkbox with icon", feedback_checkbox, pic_bytes);
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);

```

addCheckBox(name, feedback_item, icon, mnemonic, enabled, align)

Add a checkbox at the selected index (starting at 0) or at the end.

Parameters

String	name	the checkbox text; this can be also html if enclosed between html tags
Function	feedback_item	the feedback function
Object	icon	the checkbox icon (can be an image URL or the image content byte array)
String	mnemonic	the checkbox mnemonic
Boolean	enabled	the enabled state of the checkbox
Number	align	the alignment type

Returns

[CheckBox](#) checkbox

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the checkbox will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addCheckBox("checkbox", feedback_checkbox);
// add a checkbox with an icon
menu.addCheckBox("checkbox with icon", feedback_checkbox, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addCheckBox("checkbox with icon", feedback_checkbox, pic_bytes);
// add a checkbox with a mnemonic
menu.addCheckBox("checkbox with mnemonic", feedback_checkbox, "media:///yourimage.gif", "c");
// add a disabled checkbox
menu.addCheckBox("checkbox disabled", feedback_checkbox, "media:///yourimage.gif", "d", false);
// add a checkbox with text aligned to the right
menu.addCheckBox("align right", feedback_checkbox, null, null, true, MenuItem.ALIGN_RIGHT);

// add a checkbox at a given index (checkbox properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var chk = menu.addCheckBox(2);
chk.text = "checkbox at index";
chk.setMethod(feedback_checkbox);
```

addMenu()

Add a submenu at the end.

Returns

[Menu](#) the submenu

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add a first submenu
var submenul = menu.addMenu("submenu 1");
submenul.addMenuItem("sub item 1 - 1", feedback_item);
// add a submenu as child of the first submenu
var submenul_2 = submenul.addMenu("submenu 1 - 2");
submenul_2.addMenuItem("sub item 1 - 2 - 1", feedback_item);
// add another submenu as a child of the first submenu
var submenul_3 = submenul.addMenu("submenu 1 - 3");
submenul_3.addMenuItem("sub item 1 - 3 - 1", feedback_item);
// add a submenu to the second submenu of the first submenu
var submenul_3_2 = submenul_2.addMenu("submenu 1 - 2 - 2");
submenul_3_2.addMenuItem("sub item 1 - 2 - 2 - 1", feedback_item);
// add a submenu directly to the menu, at the first position
var submenu0 = menu.addMenu(0);
submenu0.text = "submenu 0";
submenu0.addMenuItem("sub item 0 - 1", feedback_item);
```

addMenu(index)

Add a submenu at the selected index (starting at 0).

Parameters

[Number](#) index the index at which to add the submenu

Returns

[Menu](#) the submenu

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add a first submenu
var submenu1 = menu.addMenu("submenu 1");
submenu1.addItem("sub item 1 - 1", feedback_item);
// add a submenu as child of the first submenu
var submenu1_2 = submenu1.addMenu("submenu 1 - 2");
submenu1_2.addItem("sub item 1 - 2 - 1", feedback_item);
// add another submenu as a child of the first submenu
var submenu1_3 = submenu1.addMenu("submenu 1 - 3");
submenu1_3.addItem("sub item 1 - 3 - 1", feedback_item);
// add a submenu to the second submenu of the first submenu
var submenu1_3_2 = submenu1_2.addMenu("submenu 1 - 2 - 2");
submenu1_3_2.addItem("sub item 1 - 2 - 2 - 1", feedback_item);
// add a submenu directly to the menu, at the first position
var submenu0 = menu.addMenu(0);
submenu0.text = "submenu 0";
submenu0.addItem("sub item 0 - 1", feedback_item);
```

addMenu(name)

Add a submenu with given name.

Parameters

[String](#) name the text of the submenu; this can be also html if enclosed between html tags

Returns

[Menu](#) the submenu

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add a first submenu
var submenu1 = menu.addMenu("submenu 1");
submenu1.addItem("sub item 1 - 1", feedback_item);
// add a submenu as child of the first submenu
var submenu1_2 = submenu1.addMenu("submenu 1 - 2");
submenu1_2.addItem("sub item 1 - 2 - 1", feedback_item);
// add another submenu as a child of the first submenu
var submenu1_3 = submenu1.addMenu("submenu 1 - 3");
submenu1_3.addItem("sub item 1 - 3 - 1", feedback_item);
// add a submenu to the second submenu of the first submenu
var submenu1_3_2 = submenu1_2.addMenu("submenu 1 - 2 - 2");
submenu1_3_2.addItem("sub item 1 - 2 - 2 - 1", feedback_item);
// add a submenu directly to the menu, at the first position
var submenu0 = menu.addMenu(0);
submenu0.text = "submenu 0";
submenu0.addItem("sub item 0 - 1", feedback_item);
```

addItem()

Add a menu item.

Returns

[MenuItem](#) menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addItem("item with icon", feedback_item, pic_bytes);
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
//add an entry with fontawesome icon. Only supported in NGClient!
menu.addItem("an entry", this.feedback, 'fas fa-trash-alt');
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addItem(index)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

[Number](#) index the index at which to add the menu item

Returns

[MenuItem](#) menu item

Supported Clients

SmartClient,WebClient,NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addItem("item with icon", feedback_item, pic_bytes);
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
//add an entry with fontawesome icon. Only supported in NGClient!
menu.addItem("an entry", this.feedback, 'fas fa-trash-alt');
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);
```

addMenuItem(name)

Add a menu item with given name.

Parameters

[String](#) name the menu item text; this can be also html if enclosed between html tags

Returns

[MenuItem](#) menu item

Supported Clients

SmartClient,WebClient,NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu

menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addItem("item with icon", feedback_item, pic_bytes);
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
//add an entry with fontawesome icon. Only supported in NGClient!
menu.addItem("an entry", this.feedback, 'fas fa-trash-alt');
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);

```

addItem(name, feedback_item)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

String name the menu item text; this can be also html if enclosed between html tags
Function feedback_item the feedback function

Returns

MenuItem menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addItem("item with icon", feedback_item, pic_bytes);
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
//add an entry with fontawesome icon. Only supported in NGClient!
menu.addItem("an entry", this.feedback, 'fas fa-trash-alt');
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);

```

addItem(name, feedback_item, icon)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

String name the menu item text; this can be also html if enclosed between html tags
Function feedback_item the feedback function
Object icon the menu item icon (can be an image URL or the image content byte array)

Returns

MenuItem menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addItem("item with icon", feedback_item, pic_bytes);
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
//add an entry with fontawesome icon. Only supported in NGClient!
menu.addItem("an entry", this.feedback, 'fas fa-trash-alt');
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);

```

addItem(name, feedback_item, icon, mnemonic)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

String	name	the menu item text; this can be also html if enclosed between html tags
Function	feedback_item	the feedback function
Object	icon	the menu item icon (can be an image URL or the image content byte array)
String	mnemonic	the menu item mnemonic

Returns

MenuItem menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu

var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);

```

addItem(name, feedback_item, icon, mnemonic, enabled)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

String	name	the menu item text; this can be also html if enclosed between html tags
Function	feedback_item	the feedback function
Object	icon	the menu item icon (can be an image URL or the image content byte array)
String	mnemonic	the menu item mnemonic
Boolean	enabled	the enabled state of the menu item

Returns

MenuItem menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method

// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addItem("item with icon", feedback_item, pic_bytes);
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
//add an entry with fontawesome icon. Only supported in NGClient!
menu.addItem("an entry", this.feedback, 'fas fa-trash-alt');
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);

```

addItem(name, feedback_item, icon, mnemonic, enabled, align)

Add a menu item at the selected index (starting at 0) or at the end.

Parameters

String	name	the menu item text; this can be also html if enclosed between html tags
Function	feedback_item	the feedback function
Object	icon	the menu item icon (can be an image URL or the image content byte array).In NGClient we also support fontawesome class.
String	mnemonic	the menu item mnemonic
Boolean	enabled	the enabled state of the menu item
Number	align	the alignment type

Returns

MenuItem menu item

Supported Clients

SmartClient,WebClient,NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the item will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addItem("item", feedback_item);
// add an item with an icon
menu.addItem("item with icon", feedback_item, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addItem("item with icon", feedback_item, pic_bytes);
// add an item with a mnemonic
menu.addItem("item with mnemonic", feedback_item, "media:///yourimage.gif", "i");
//add an entry with fontawesome icon. Only supported in NGClient!
menu.addItem("an entry", this.feedback, 'fas fa-trash-alt');
// add a disabled item
menu.addItem("disabled item", feedback_item, "media:///yourimage.gif", "d", false);
// add an item with text aligned to the right
menu.addItem("align right", feedback_item, null, null, true, SM_ALIGNMENT.RIGHT);

// add an item at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var item = menu.addItem(2);
item.text = "item at index";
item.setMethod(feedback_item);

```

addRadioButton()

Add a radio button.

Returns

[RadioButton](#) a radio button menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the radiobutton will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addRadioButton("radio", feedback_radiobutton);
// add a radiobutton with an icon
menu.addRadioButton("radio with icon", feedback_radiobutton, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addRadioButton("radio with icon", feedback_radiobutton, pic_bytes);

// add a new radiobutton group
// a group will 'bind' all added radiobuttons after the group together
// as a result checking one item will uncheck the other
// if no group is added, a group is created automatically when the first radiobutton is added to the menu
// so in this case we will have two groups, one with the radiobuttons added until now and one with the ones
// added from now on
menu.addRadioGroup();

// add a radiobutton with a mnemonic
menu.addRadioButton("radio with mnemonic", feedback_radiobutton, "media:///yourimage.gif", "i");
// add a disabled radiobutton
menu.addRadioButton("disabled radio", feedback_radiobutton, "media:///yourimage.gif", "d", false);
// add a radiobutton with text aligned to the right
menu.addRadioButton("align right", feedback_radiobutton, null, null, true, SM_ALIGNMENT.RIGHT);
// add a radiobutton at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);
```

addRadioButton(index)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

[Number](#) index the index at which to add the radio button

Returns

[RadioButton](#) a radio button menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the radiobutton will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addRadioButton("radio", feedback_radiobutton);
// add a radiobutton with an icon
menu.addRadioButton("radio with icon", feedback_radiobutton, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addRadioButton("radio with icon", feedback_radiobutton, pic_bytes);

// add a new radiobutton group
// a group will 'bind' all added radiobuttons after the group together
// as a result checking one item will uncheck the other
// if no group is added, a group is created automatically when the first radiobutton is added to the menu
// so in this case we will have two groups, one with the radiobuttons added until now and one with the ones
// added from now on
menu.addRadioGroup();

// add a radiobutton with a mnemonic
menu.addRadioButton("radio with mnemonic", feedback_radiobutton, "media:///yourimage.gif", "i");
// add a disabled radiobutton
menu.addRadioButton("disabled radio", feedback_radiobutton, "media:///yourimage.gif", "d", false);
// add a radiobutton with text aligned to the right
menu.addRadioButton("align right", feedback_radiobutton, null, null, true, SM_ALIGNMENT.RIGHT);
// add a radiobutton at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);

```

addRadioButton(name)

Add a radio button with given name.

Parameters

[String](#) name the radio button text; this can be also html if enclosed between html tags

Returns

[RadioButton](#) a radio button menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the radiobutton will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method

// be sure to enter the method WITHOUT '()' at the end
menu.addRadioButton("radio", feedback_radiobutton);
// add a radiobutton with an icon
menu.addRadioButton("radio with icon", feedback_radiobutton, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addRadioButton("radio with icon", feedback_radiobutton, pic_bytes);

// add a new radiobutton group
// a group will 'bind' all added radiobuttons after the group together
// as a result checking one item will uncheck the other
// if no group is added, a group is created automatically when the first radiobutton is added to the menu
// so in this case we will have two groups, one with the radiobuttons added until now and one with the ones
// added from now on
menu.addRadioGroup();

// add a radiobutton with a mnemonic
menu.addRadioButton("radio with mnemonic", feedback_radiobutton, "media:///yourimage.gif", "i");
// add a disabled radiobutton
menu.addRadioButton("disabled radio", feedback_radiobutton, "media:///yourimage.gif", "d", false);
// add a radiobutton with text aligned to the right
menu.addRadioButton("align right", feedback_radiobutton, null, null, true, SM_ALIGNMENT.RIGHT);
// add a radiobutton at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);

```

addRadioButton(name, feedback_item)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

String name the radio button text; this can be also html if enclosed between html tags
Function feedback_item the feedback function

Returns

RadioButton a radio button menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);

```

addRadioButton(name, feedback_item, icon)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

String name the radio button text; this can be also html if enclosed between html tags
Function feedback_item the feedback function
Object icon the radio button icon (can be an image URL or the image content byte array)

Returns

RadioButton a radio button menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";

var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);

```

addRadioButton(name, feedback_item, icon, mnemonic, enabled)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

String	name	the radio button text; this can be also html if enclosed between html tags
Function	feedback_item	the feedback function
Object	icon	the radio button icon (can be an image URL or the image content byte array)
String	mnemonic	the radio button mnemonic
Boolean	enabled	the enabled state of radio button

Returns

RadioButton a radio button menu item

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the radiobutton will be added at the last position

rd.text = "radio at index";
rd.setMethod(feedback_item);

```

addRadioButton(name, feedback_item, icon, mnemonic, enabled, align)

Add a radiobutton at the selected index (starting at 0) or at the end.

Parameters

String name	the radio button text; this can be also html if enclosed between html tags
Function feedback_item	the feedback function
Object icon	the radio button icon (can be an image URL or the image content byte array)
String mnemonic	the radio button mnemonic
Boolean enabled	the enabled state of radio button
Number align	the alignment type

Returns

RadioButton a radio button menu item

Supported Clients

SmartClient, WebClient, NGClient

```

addRadioGroup()

Add a radiogroup for radiobuttons. A radiogroup groups together all radiobuttons that are added after the group is added. From all radiobuttons that belong to the same radiogroup only one can be checked at a time.

If no radiogroup is added, one is created automatically when the first radiobutton is added.

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// when you don't define an index the radiobutton will be added at the last position
// this is what you usually do to build a new menu
// minimum settings are the text and method
// the method can be a global or form method
// be sure to enter the method WITHOUT '()' at the end
menu.addRadioButton("radio", feedback_radiobutton);
// add a radiobutton with an icon
menu.addRadioButton("radio with icon", feedback_radiobutton, "media:///yourimage.gif");
//var pic_bytes = plugins.file.readFile("/path/to/image.jpg");
//menu.addRadioButton("radio with icon", feedback_radiobutton, pic_bytes);

// add a new radiobutton group
// a group will 'bind' all added radiobuttons after the group together
// as a result checking one item will uncheck the other
// if no group is added, a group is created automatically when the first radiobutton is added to the menu
// so in this case we will have two groups, one with the radiobuttons added until now and one with the ones
// added from now on
menu.addRadioGroup();

// add a radiobutton with a mnemonic
menu.addRadioButton("radio with mnemonic", feedback_radiobutton, "media:///yourimage.gif", "i");
// add a disabled radiobutton
menu.addRadioButton("disabled radio", feedback_radiobutton, "media:///yourimage.gif", "d", false);
// add a radiobutton with text aligned to the right
menu.addRadioButton("align right", feedback_radiobutton, null, null, true, SM_ALIGNMENT.RIGHT);
// add a radiobutton at a given index (item properties must be configured after creation)
// indexes start at 0 (zero) so index 2 is in fact position 3
var rd = menu.addRadioButton(2);
rd.text = "radio at index";
rd.setMethod(feedback_item);
```

addSeparator()

Add the separator at the selected index (starting at 0) or at the end (empty).

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add an item and a checkbox
menu.addMenuItem("item", feedback_item);
menu.addCheckBox("checkbox", feedback_checkbox);
// add a separator
menu.addSeparator();
// add a radiobutton. it will be separated from the rest of the control by the separator
menu.addRadioButton("radio", feedback_radiobutton);
// add another separator between the item and the checkbox
menu.addSeparator(1);
```

addSeparator(index)

Add the separator at the selected index (starting at 0) or at the end (empty).

Parameters

[Number](#) index the index at which to add the separator

Supported Clients

SmartClient,WebClient,NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add an item and a checkbox
menu.addMenuItem("item", feedback_item);
menu.addCheckBox("checkbox", feedback_checkbox);
// add a separator
menu.addSeparator();
// add a radiobutton. it will be separated from the rest of the control by the separator
menu.addRadioButton("radio", feedback_radiobutton);
// add another separator between the item and the checkbox
menu.addSeparator(1);
```

getCheckBox(index)

Get the checkbox at the selected index (starting at 0).

Parameters

[Number](#) index;

Returns

[CheckBox](#)

Supported Clients

SmartClient,WebClient,NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
}
else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}

```

getClientProperty(key)

Gets the specified client property for the element based on a key.

Parameters

[Object](#) key;

Returns

[Object](#)

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// NOTE: Depending on the operating system, a user interface property name may be available.
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add an item to the menu
menu.addItem("item", feedback_item);

// set the tooltip of the menu via client properties
// keep the original tooltip in a form or global variable
originalTooltip = menu.getClientProperty("ToolTipText");
menu.putClientProperty("ToolTipText", "changed tooltip");

// later restore the original tooltip from the variable
//var menubar = plugins.window.getMenuBar();
//var menu = menubar.getMenu(menubar.getMenuCount()-1);
//menu.putClientProperty("ToolTipText", originalTooltip);
```

getItem(index)

Get the item at the selected index (starting at 0).

Parameters

[Number](#) index;

Returns

[Object](#)

Supported Clients

SmartClient, WebClient, NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
}
else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}

```

getItemCount()

Get the number of items in the menu.

Returns

[Number](#)

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// REMARK: indexes start at 0, disabled items, non visible items and separators are counted also
// REMARK: this is especially important when getting items by the index
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a checkbox
menu.addCheckBox("check", feedback_checkbox);
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

// remove the last item
menu.removeItem(menu.getItemCount() - 1);
```

getItemIndexByText(text)

Retrieve the index of the item by text.

Parameters

[String](#) text;

Returns

[Number](#)

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a checkbox
menu.addCheckBox("check", feedback_checkbox);
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

// find the index of the checkbox
var idx = menu.getItemIndexByText("check");
// remove the checkbox by its index
menu.removeItem(idx);
// remove both radiobuttons by their indices
menu.removeItem([0, 1]);
// remove all remaining entries
menu.removeAllItems();
// add back an item
menu.addMenuItem("new item", feedback_item);
```

getMenu(index)

Get the submenu at the selected index (starting at 0).

Parameters

[Number](#) index;

Returns

[Menu](#)

Supported Clients

SmartClient,WebClient,NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
}
else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}
```

getRadioButton(index)

Get the radiobutton at the selected index (starting at 0).

Parameters

[Number](#) index;

Returns

[RadioButton](#)

Supported Clients

SmartClient,WebClient,NGClient

Sample

```

// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a menu item, with a separator before it
menu.addSeparator();
menu.addMenuItem("item", feedback_item);
// add a checkbox, with a separator before it
menu.addSeparator();
menu.addCheckBox("check", feedback_checkbox);
// add a submenu with an item under it
var submenu = menu.addMenu("submenu");
submenu.addMenuItem("subitem", feedback_item);

// depending on some state, update the entries in the menu
var some_state = true;
if (some_state) {
    // select the first radiobutton
    menu.getRadioButton(0).selected = true;
} else {
    // select the first radiobutton
    menu.getRadioButton(1).selected = true;
}
// enable/disable the menu item
// remember to include the separators also when counting the index
menu.getItem(3).enabled = !some_state;
// select/unselect the checkbox
// remember to include the separators also when counting the index
menu.getCheckBox(5).selected = some_state;
// change the text of the submenu and its item
application.output(menu.getItemCount());
if (some_state) {
    menu.getMenu(6).text = "some state";
    menu.getMenu(6).getItem(0).text = "some text";
}
else {
    menu.getMenu(6).text = "not some state";
    menu.getMenu(6).getItem(0).text = "other text";
}

```

putClientProperty(key, value)

Sets the value for the specified element client property key.

Parameters

Object key ;
Object value ;

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// NOTE: Depending on the operating system, a user interface property name may be available.
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add an item to the menu
menu.addItem("item", feedback_item);

// set the tooltip of the menu via client properties
// keep the original tooltip in a form or global variable
originalTooltip = menu.getClientProperty("ToolTipText");
menu.putClientProperty("ToolTipText", "changed tooltip");

// later restore the original tooltip from the variable
//var menubar = plugins.window.getMenuBar();
//var menu = menubar.getMenu(menubar.getMenuCount()-1);
//menu.putClientProperty("ToolTipText", originalTooltip);
```

removeAllItems()

Remove all items from the menu.

Supported Clients

SmartClient,WebClient,NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a checkbox
menu.addCheckBox("check", feedback_checkbox);
// add a menu item
menu.addItem("item", feedback_item);
// add another menu item
menu.addItem("item 2", feedback_item);

// find the index of the checkbox
var idx = menu.getItemIndexByText("check");
// remove the checkbox by its index
menu.removeItem(idx);
// remove both radiobuttons by their indices
menu.removeItem([0, 1]);
// remove all remaining entries
menu.removeAllItems();
// add back an item
menu.addItem("new item", feedback_item);
```

removeItem(index)

Remove the item(s) at the selected index/indices.

Parameters

[Array](#) index array of one or more indexes corresponding to items to remove

Supported Clients

SmartClient,WebClient,NGClient

Sample

```
// add a new menu to the menubar
var menubar = plugins.window.getMenuBar();
var menu = menubar.addMenu();
menu.text = "New Menu";
// alternatively create a popup menu
//var menu = plugins.window.createPopupMenu();

// add two radiobuttons
menu.addRadioButton("radio one", feedback_radiobutton);
menu.addRadioButton("radio two", feedback_radiobutton);
// add a checkbox
menu.addCheckBox("check", feedback_checkbox);
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

// find the index of the checkbox
var idx = menu.getItemIndexByText("check");
// remove the checkbox by its index
menu.removeItem(idx);
// remove both radiobuttons by their indices
menu.removeItem([0, 1]);
// remove all remaining entries
menu.removeAllItems();
// add back an item
menu.addMenuItem("new item", feedback_item);
```

show()

Show the popup at the mouse coordinates (Smart client only).

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```

show(jsEvent)

Show the popup based on JSEvent information. This can be used to show popup in tableview header that is styled with labelfor label.

Parameters

[Object](#) jsEvent;

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```

show(component)

Show the popup below the specified element. If there is no available room, the popup is displayed above. In NGClient, using a component from tableview/listview form doesn't work, you have to specify coordinates (from JSEvent).

Parameters

[Object](#) component;

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addMenuItem("item", feedback_item);
// add another menu item
menu.addMenuItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```

show(component, positionTop)

Show the popup menu according to the positionTop parameter. By default the popup menu is displayed below the component, and if there is no room available it is displayed above. If positionTop is true, and there is enough room available, then popup menu is displayed above; By default, positionTop is false. If there is not enough space above or under the component, the behavior is undefined (the browser will decide how menu is displayed)

Parameters

[Object](#) component ;

[Boolean](#) positionTop ;

Supported Clients

NGClient

Sample

```
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addItem("item", feedback_item);
// display the popup above the components (if there is room available)
menu.show(event.getSource(), true);
// display the popup above the components (if there is room available) adding the specified coordinated relative
to the component
menu.show(event.getSource(), 3, 5, true);
```

show(component, x, y)

Show the popup below to the specified element, adding x and y values relative to the element.
If there is no available room, the popup is displayed above.

Parameters

```
Object component;
Number x        ;
Number y        ;
```

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addItem("item", feedback_item);
// add another menu item
menu.addItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```

show(component, x, y, positionTop)

Show the popup menu according to the positionTop, x, y parameters.
By default the popup menu is show at the x, y coordinates.
If positionTop is true, and there is enough room available, then popup menu's bottom - left corner is ending at the specified coordinates;
x, y values are relative to top-left corner of the component.
By default, positionTop is false.
If there is not enough space above or under the component, the behavior is undefined (the browser will decide how menu is displayed)

Parameters

```
Object component ;
Number x          ;
Number y          ;
Boolean positionTop;
```

Supported Clients

NGClient

Sample

```
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addItem("item", feedback_item);
// display the popup above the components (if there is room available)
menu.show(event.getSource(), true);
// display the popup above the components (if there is room available) adding the specified coordinated relative
to the component
menu.show(event.getSource(), 3, 5, true);
```

show(x, y)

Show the popup at x an y coordinates.

Parameters

Number x;

Number y;

Supported Clients

SmartClient, WebClient, NGClient

Sample

```
// NOTE: usually this code is placed in a handler of an event (e.g. right click on some component)
// create a popup menu
var menu = plugins.window.createPopupMenu();
// add a menu item
menu.addItem("item", feedback_item);
// add another menu item
menu.addItem("item 2", feedback_item);

if (event.getSource())
{
    // display the popup over the component which is the source of the event
    menu.show(event.getSource());
    // display the popup over the components, at specified coordinates relative to the component
    //menu.show(event.getSource(), 10, 10);
    // display the popup at specified coordinates relative to the main window
    //menu.show(100, 100);
}

// in Smart client, you can also use show with no parameters, it will show at the mouse coordinates:
//menu.show();
```
