8.2.3 RC

If you are uploading through code large solutions to a server please have another look at this: Deploying using external tools

Because you have to use preemptive authentication what we now also do in our deploy directly from the wizard (SVY-12179)

The JQuery lib is updated from 3.2.0 to 3.2.1 because of some regressions, mostly visible when using our calendar component in ngclient.
