8.3 RC1

See Whats new for more information about the 8.3 release

Components	Key	Summary
Developer	SVY-11869	Show method description/params/example/... in SolEx list similar to what is shown in code editor
Developer	SVY-11853	Warn when form var name overlaps with a column of foundset property (custom component)
Developer	SVY-11849	-Dwebserver-file option not working in Servoy 8.2.1
Developer	SVY-11789	You can't navigate from the datasource property to the in memory datasource
Developer	SVY-11788	You can't locate in-memory datasources with the locate Servoy Resource (shift alt k)
Developer	SVY-11763	Form designer: Errors in console when dragging an extra-table from palette
Developer	SVY-10733	Allow multiple solutions in WAR export
Developer	SVY-10458	A way to revert to defaults (someof) the settings from war export wizard
Developer	SVY-10264	Code Complete not supported for QBSelect datasource in js type tag
Developer, NGClient	SVY-11693	jsForm.getWebComponents() and jsForm.getWebComponent('name') don't work on responsive forms
Developer	SVY-11633	Allow to edit scopes of pre and post import modules while in the main solution
Developer, NGClient	SVY-11628	cant overide attributes of components nested formcomponents
Developer	SVY-11629	Being able to see the name of a row in the outline
Developer	SVY-11590	Add ability to create abstract forms from new form wizard
Developer	SVY-11589	Form Hierarchy View incorrectly shows override status
Developer	SVY-11529	go over the images on 8.3 to see if they are all replaced
Developer	SVY-11503	modules support when creating valuelist
Developer	SVY-11441	hide inherited elements doesn't work in the new editor
Developer	SVY-11039	Use non-minified versions of js libs while in developer
Developer	SVY-11760	Form editor: responsive highlight remains out of sync when resizing editor
Developer	SVY-11745	Form designer - highlight components in toolbar behavior
Developer	SVY-11738	Show custom icon of NG Services under the "plugin" node
Developer	SVY-11670	Add a toggle in solex form's methods to show/hide inherited methods
Developer	SVY-11526	Issues with properties (like attributes and designtimeProperties) in properties view
Developer	SVY-11429	Ability to open Form Hierarchy Viewer from a method in the Script Editor
Developer	SVY-11891	Missing delete option in the right-click on a calculation
Developer	SVY-12115	merge the hackaton branch for progress integration into 8.3
Developer, NGClient	SVY-12116	make tests for different database for the new stored procedure stuff
Developer	SVY-12096	Option to disable auto-sync of i18n tables to developer
Developer, Server	SVY-11587	Make Table Filters support more complex configurations
Developer	SVY-11235	Check developer startup with java 9 (upgrade developer to latest eclipse)
Developer	SVY-10219	Enums not supported in column auto-enter lookups
Developer	SVY-11075	Enhance functionality to re-order component's customTypes
Developer, DLTK	SVY-11603	entity scope code completion only matches 1 method of a foundset
Developer	SVY-11414	Show files of Web Components in solex that live in in subdirectories in actual subdirectories
Developer	SVY-11408	performance profile developer, memory usage and builder
Developer	SVY-11871	[dark theme] fix visibility of certain parts
Developer	SVY-12105	NGCLient Only API filtering in Developer not complete

Developer, DLTK	SVY-12058	Step Return when in a function call on a line containing multiple nested function calls, results in a Step Over
Developer	SVY-12107	Form Hierarchy Viewer called on Form with Sub forms shows an exand triangle for (most?) of the subforms, even if they don't have further children
Developer	SVY-12217	PK sequence type i18n table
Developer, SmartClient	SVY-12296	plugins.clientmanager.getConnectedClients() idleTime Equals loginTime.
Developer	SVY-12269	Servoy Form Components show a navigator
Developer	SVY-7298	list procedure names
Developer	SVY-12245	NPE when you get into duplicate package situation
Developer	SVY-12050	Source and destination on relation screen not shown properly
Developer	SVY-9865	Running unit tests have two options run & debug. Both hit breakpoints.
Developer, DLTK	SVY-8452	Automatically insert @override JSDoc tag on methods that override a super method
Extensions	SVY-11608	investigate if we still need to bundle the imageio.jar from the images plugin
Extensions, NGClient	SVY-12036	Ability to target specific popup menus through CSS
Extensions	SVY-12042	Add a method getLockedByClient() and getLocks() to clientmanager plugin
Extensions	SVY-12165	Remove table parameter from rawSQL.executeSQL
Extensions, NGClient	SVY-12282	Header on the extra grid component not resing on the first show
Extensions, NGClient	SVY-11782	Warnings on bootstrap calendar usage
NGClient	SVY-11825	implement client design mode for ngclient
NGClient	SVY-11794	Enchance security of complex components (Navbar, Sidenav etc..)
NGClient	SVY-10226	Cmd. line: exporter should fail rather then fall-back to real tables if dbi not found
NGClient	SVY-11673	Country part of Locale clientSide not getting through in $sabloApplication on i18n.setLocale(...) call
NGClient	SVY-11570	console.log in serverside script on stuff like rowRef or foundsetRef doesn't yield anything useful
NGClient	SVY-11743	formIndex (z-order) should be a standard property on web components
NGClient	SVY-11569	Automatic redirect to "index.html" when starting solution from URL
NGClient	SVY-11666	Update shipped versions of bootstrap-datetimepicker
NGClient	SVY-11579	NG-client link for non-existing solution does say the solution does not exist
NGClient	SVY-11525	Handler translate clientside foundset's record to JSRecord
NGClient	SVY-12150	Incorrect warning when attaching scope methods to formComponent button
NGClient	SVY-12045	make customized NG templates visible also in the developer
NGClient	SVY-11867	remove anchoring for a moment when putting a form in client design mode
NGClient	SVY-11792	ERROR com.servoy.j2db.util.Debug - Cancelled while executing service call servicesA.cleanup(...). Arguments: null
NGClient	SVY-12242	Add cache busting property to spec libraries
NGClient	SVY-12237	cloned forms don't have security applied (responsive NG forms)
NGClient	SVY-12295	Update to V8.2.3 breaks solution
NGClient	SVY-12248	NG Client: Date selection does not work in IE on Chinese Region settings
NGClient	SVY-12240	Negative format not working in NG Client
NGClient	SVY-12276	Cannot resize dialog window using setSize
NGClient, SmartClient, WebClient	SVY-11681	databaseManager.saveData(undefined) seems to fall back to saveData()
Server	SVY-11829	Show clientId in list of clients on server
Server	SVY-11777	ColumnInfo not recreated when creating a new Servoy Repository on WAR launch and the WAR was previously deployed

Server	SVY-11485	Make logging consistent for warnings related to cross DB vendor datamodel compatibility
Server	SVY-11881	Unable to import solution after Oracle JDBC driver upgrade.
Server	SVY-11373	issues with logging through application.output on different levels
Server	SVY-10959	custom web.xml for war exports
Server	SVY-12231	Import solution will break when importing with 2 developers
Testing	SVY-11486	Assume the commandline testrunner is a serverside process (to be inline with NG/WC and not SC)
Testing	SVY-11487	Align behavior between commandline testrunner and running tests in developer
NGClient, SmartClient, WebClient	SVY-11830	check solution deserializer code that is checking for overriden properties
NGClient, Server, SmartClient, WebClient	SVY-11816	first class tenant support in Servoy
NGClient, WebClient	SVY-11695	showFileOpenDialog filter does not seem to work in WC or NG
WebClient	SVY-12194	Webclient login using username with spaces throws an error
