

elements

Property Summary

Array	#allnames
	Get the names of all elements of the form, as an array.
Number	#length
	Get the number of elements of the form.

Property Details

allnames

Get the names of all elements of the form, as an array.

Returns

Array

Sample

```
for (var i=0; i<forms.customer.elements.allnames.length; i++)
{
    var name = forms.customer.elements.allnames[i];
    var elem = forms.customer.elements[name];
    application.output(name + ": " + elem.getDataProviderID());
}
```

length

Get the number of elements of the form.

Returns

Number

Sample

```
for (var i=0; i<forms.customer.elements.length; i++)
{
    var elem = forms.customer.elements[i];
    application.output(elem.getName() + ": " + elem.getDataProviderID());
}
```
