Deployment Guide

About This Guide

This guide covers the deployment of solutions build on the Servoy platform to end-users. The guide focuses mainly on the client-server deployment model using the Servoy Application Server and the Smart and Web Client. Additionally, there is a chapter on the Servoy Runtime Client, which can be used for locally installed, stand-alone solutions.

This guide assumes a solution is available and ready for deployment and that the developer of the solution provided information about the deployment options the solution supports. For more information on choosing which deployment options to support when developing a solutions, see the Deployment Options chapter in the Programming Guide.

In This Guide

- Solution Deployment Options
- Servoy Deployment Architecture
- Application Server
- Server Scaling
- Smart Client
- Web Client
- NGClient deployment
- Batch Processor
- Headless Client
- Runtime Client
- Appendix
- Deploying using external tools.
