Updating Servoy Developer

A list of available updates to Servoy and any other components of the Eclipse IDE can be accessed via the menu item Help > Check for Updates.

- A list of available updates will show on the wizard, and you can select or deselect items you wish to update.
- Follow the steps in the wizard, including accepting new license agreements, to complete the update.
- When finished, select from the following restart options (see image), as needed: Not Now, Apply Changes, or Restart Now.

0	O Software Updates
1	You will need to restart Servoy Developer for the installation changes to take effect. You may try to apply the changes without restarting, but this may cause errors.
	Not Now Apply Changes Now Restart Now

Note: Upon restarting the updated Servoy version, you will be prompted to upgrade the Servoy Repository to continue. Confirm that you wish to proceed (it is recommended that you create a backup of the repository before you do so). Another restart is required after this step.
