

Variable

Property Summery

String `#defaultValue`
The default value of the variable.

String `#name`
The name of the variable.

Number `#variableType`
The type of the variable.

Property Details

`defaultValue`

The default value of the variable.

It is interpreted as a JS expression.

For INTEGER variables it can be an integer constant, like 10 for example.
For NUMBER variables it can be a real constant, like 22.41. For DATETIME
variables it can be "now", or a JS expression like "new Date()". For TEXT
variables it can be any string surrounded with quotes, like 'some text'.

Returns

String

`name`

The name of the variable.

Returns

String

`variableType`

The type of the variable. Can be one of: TEXT, INTEGER, NUMBER, DATETIME or MEDIA.

Returns

Number
