Deleting a Servoy Solution

To delete a solution from the workspace:

1. Select **Delete Solution** from the context menu on the All solutions node.
2. If desired, select the checkbox to delete project files from the disk.
3. Click **OK.**

> ⚠️ **Tip:** If the project files were not deleted, the project can be restored to the workspace by using the File>Import menu. In the Import source window, open the **General** node and select **Existing Projects into Workspace.** Click **Next** and browse to the /servoy_workspace folder to select the solution folder you wish to restore.
