Download & Install Servoy Developer

If you already have the Servoy Developer installed and running on your machine, you can skip this chapter, otherwise the first step for installing Servoy is to r egister into Servoy Cloud and download the appropriate full Installer for your Operating System:

File type	Operating System
Executable **exe**	Windows
dmg package	OSX - Intel
dmg package	OSX - M1
tar file	Linux

The installation application is a standard installation wizard, coherent with your Operating System, that will drive you to have the Servoy Developer installed in your machine in few minutes.

⚠ The full installers/archives are only for new installs, never use them to update/overwrite an existing install, existing installations should always be updated through the "check for updates" menu of running IDE

Servoy is released using a strict release schedule which can be found here: Servoy Release Schedule And Release Notes

The latest releases notes are:

2021.12 Whats new
