Using the Form Editor

The Form Editor is a graphical user interface that allows users to quickly and easily create form applications without the need for manual coding. Servoy features layout tools that offer quick and easy access to different formatting options. Many of these functions are available through the main menu, via keyboard shortcuts, the Editing Toolbar, and the context menu.

In this chapter, we:

- Describe the parts and features of the Form Editor
- Provide instructions for creating a new form
- Describe the available tools for form layout and design
