Property Details

[index]

Get an element of the form by its index.

Returns

RuntimeComponent

Sample

```
for (var i=0; i<forms.customer.elements.length; i++)
{
	var elem = forms.customer.elements[i];
	application.output(elem.getName() + ": " + elem.getDataProviderID());
}
```

[name]

Get an element of the form by its name.

Returns

RuntimeComponent

Sample

```
for (var i=0; i<forms.customer.elements.allnames.length; i++)
{
	var name = forms.customer.elements.allnames[i];
	var elem = forms.customer.elements[name];
	application.output(name + ": " + elem.getDataProviderID());
}
```

allnames

Get the names of all elements of the form, as an array.

Returns

String[]

Sample

```
for (var i=0; i<forms.customer.elements.allnames.length; i++)
{
	var name = forms.customer.elements.allnames[i];
	var elem = forms.customer.elements[name];
	application.output(name + ": " + elem.getDataProviderID());
}
```

length

Get the number of elements of the form.

Returns

Number

Sample

```
for (var i=0; i<forms.customer.elements.length; i++)
{
        var elem = forms.customer.elements[i];
        application.output(elem.getName() + ": " + elem.getDataProviderID());
}
```
