```
if (action == SQL_ACTION_TYPES.INSERT_ACTION)
                application.output("it was an insert");
        else if (action == SQL_ACTION_TYPES.DELETE_ACTION)
                application.output("it was a delete");
        else if (action == SQL_ACTION_TYPES.UPDATE_ACTION)
                application.output("it was an update");
        else if (action == SQL_ACTION_TYPES.SELECT_ACTION)
                application.output("it was a select");
        else if (action == SQL_ACTION_TYPES.NO_ACTION)
                application.output("it was nothing");
        else
                application.output("what was this?");
```

# INSERT\_ACTION

Constant for the "insert" SQL action.

# Returns

Number

#### Sample

```
if (action == SQL_ACTION_TYPES.INSERT_ACTION)
                application.output("it was an insert");
        else if (action == SOL ACTION TYPES.DELETE ACTION)
                application.output("it was a delete");
        else if (action == SQL_ACTION_TYPES.UPDATE_ACTION)
                application.output("it was an update");
        else if (action == SQL_ACTION_TYPES.SELECT_ACTION)
                application.output("it was a select");
        else if (action == SQL_ACTION_TYPES.NO_ACTION)
                application.output("it was nothing");
        else
                application.output("what was this?");
```

# NO ACTION

Constant expressing that no SQL action took place.

Returns

Number

#### Sample

#### SELECT ACTION

Constant for the "select" SQL action.

# Returns

Number

#### Sample

# UPDATE\_ACTION

Constant for the "update" SQL action.

# Returns

Number
