

Algorithm

May 03, 2024 16:50

Supported Clients

SmartClient WebClient NGClient

Methods Summary

[Algorithm](#) [kid\(kid\)](#) The key identifier, will be added to the token header.

Methods Details

kid(kid)
The key identifier, will be added to the token header.

Parameters

[String](#) kid the private key identifier

Returns

[Algorithm](#) the algorithm builder for method chaining

Supported Clients

SmartClient,WebClient,NGClient
