# 2021.03.3 LTS

---

This releases fixes some possible Cross Site Scripting in WebClient. Also an issue is fixed that the export of a WAR would fail with warnings because of types that where incorrectly marked as incompatible (uuids in a valuelist)

Components	Key	Summary
<a href="#">Runtime, Server</a>	<a href="#">SVY-16481</a>	<a href="#">CCC failing on error that does not show in Developer</a>
<a href="#">WebClient</a>	<a href="#">SVY-16979</a>	<a href="#">Web Client XSS Issue - Textbox &amp; Typeahead with Valuelists (2021.03.2)</a>
