

2022.03.x LTS

2022.03.4

Besides the cases below, also fixes for solutionModel/recreateUI are done that fixes memory leaks and weird errors in the log because of certain objects are still referenced.

Components	Key	Summary
NGClient	SVY-17429	Session without websocket are not closed and hangs on server
NGClient	SVY-15124	add HTML to tabpanel's tab label
NGClient	SVY-17760	controller.getFormContext returning wrong tabIndex
Runtime, Server	SVY-17661	Huge amount of clients with "unsafe park"
Runtime, Server	SVY-17656	deadlock can happen when a databroadcast happens at the same time as a saveData() on the same foundset/records
SmartClient	SVY-17735	application.getServerUUID() can be used in SmartClient

2022.03.3

Components	Key	Summary
Developer	SVY-17202	application.getLogger not showing output directly in developer console
Developer	SVY-17515	Relation item shows as Unresolved even though functionally it works
Developer, Runtime	SVY-17570	CVE for commons-text version 1.5-1.9
Developer, Server	SVY-16732	-upgradeRepository flag in war export does not upgrade repository
Extensions	SVY-17411	Tabpanel not displaying correctly for titanium client
Extensions, NGClient	SVY-17454	Bootstrap Accordion Tab text does not support html
NGClient	SVY-17343	tabIndex doesn't change in NG client
NGClient	SVY-17376	Page loading in a loop when redirected by external oauth login in TiNG
NGClient	SVY-17460	The i18n text isn't piped in the valuelists in NG Client vs SmartClient
NGClient	SVY-17510	Tooltip for TabPanel
NGClient	SVY-17463	TiNG styleClass not applied for Servoy Legacy Elements
NGClient	SVY-17596	build and test 2022.03.3 lts and 2022.9.1
NGClient	SVY-17426	Ti client ignores servoy theme for default Tab Panel
Server	SVY-17346	Broadcaster over RabbitMQ not getting the message

2022.03.2

Components	Key	Summary
Developer	SVY-17256	Creating war export from developer with empty password result in error
Developer	SVY-17257	Doing first time a war export in Servoy developer you can't do it a second time
Developer	SVY-17137	Duplicate UUIDs reported when updating module
Developer	SVY-17199	plugins.clientmanager.getClientInformation().getClientInfos() shows warning in 2022.06
Developer	SVY-17251	check at developer start always if the generated distribution is there
Developer	SVY-17285	Creating a new Solution not possible - Servoy 2022.6 (Final) - [NG2]
Developer	SVY-17304	setting log level and tracing doesn't work in admin page (from developer)
Developer	SVY-17070	[Ti] Calendar picker becomes useless after inputting invalid date time

Developer	SVY-17060	[ng2 designer] Context menu on tabpanel in responsive form
Developer	SVY-17308	[ng2 designer] show the Add menu for the extra table like components in css position layout
Extensions	SVY-17239	customrenderedcomponent throws a warning & error in the console
Extensions, NGClient	SVY-17247	ChartJS breaks NG2 because of dependency update
Extensions	SVY-15350	REST API - Option to Not Generate Response Header Values for USer Properties
Extensions, NGClient	SVY-17272	2 htmlarea components on a form interfere with each other
Extensions, NGClient	SVY-17244	Error when navigating away from form
NGClient	SVY-16861	param of type 'record' in internalApi call doesn't resolve for ViewFoundSet
NGClient	SVY-17200	Update moment.js to fix security issue
NGClient	SVY-17198	Bootstrap calendar component caught in endless loop within onchange
NGClient	SVY-17196	responsive formcomponents that extend and overrides a base form component generates wrong structure
NGClient	SVY-17172	update angularjs to 1.9.0
NGClient	SVY-17188	NG2 Component toggled to visible not registering client side before API call is executed
NGClient	SVY-17282	Layout of CSS form on CSS tab panel incorrect in NG2 only
NGClient	SVY-17311	Calendar popup does not jump to the set date
NGDesktop, Server	SVY-17299	HTMLArea (TinyMCE) doesn't work after exporting war file to Tomcat - Servoy 2022.6 [NG2]
Runtime	SVY-17163	Upgrade to 2022.03 causes error with relation
Runtime	SVY-17177	Removing a global method doesn't actually remove the global method.
Server	SVY-17240	A check that generates warning messages (when creating in-mem table) should be more relaxed
Server	SVY-17161	Log server registers original database
