Load Balancer Installation

Setting up Load Balancing using Apache HTTP Server involves the following steps:

1. Installation of **multiple Servoy Application Servers** (see Installing the Application Server):
   This chapter assumed multiple Servoy Application Server instances are already installed.
2. Installation of Apache HTTP Server
3. Configuration of Apache HTTP Server
4. Configuration of each Servoy Application Servers to work with the Load Balancer:
   To make each Servoy Application Server instance work properly with the HTTP Server
