Servoy 7.x.x

Highlights of what's new in Servoy 7

The Servoy 7 release introduced the Servoy Mobile Client. Servoy Mobile brings the Servoy paradigms of easy application development to the mobile arena.
Using Servoy Mobile it is easy to build Mobile Business applications that work offline, seamlessly syncronize data back and forth between the Mobile client and the backend systems and can be deployed both as native application or as webapp

To get started with Servoy Mobile, see the Servoy Mobile documentation

For more detail on the non Servoy Mobile features in Servoy 7, see What is new.
