

Variable

Property Summary

String	#comment
String	#defaultValue The default value of the variable.
String	#name The name of the variable.
Number	#variableType The type of the variable.

Property Details

`comment`
Replace with description

Returns

[String](#)

`defaultValue`
The default value of the variable.

It is interpreted as a JS expression.

For INTEGER variables it can be an integer constant, like 10 for example.
For NUMBER variables it can be a real constant, like 22.41. For DATETIME variables it can be "now", or a JS expression like "new Date()". For TEXT variables it can be any string surrounded with quotes, like 'some text'.

Returns

[String](#)

`name`
The name of the variable.

Returns

[String](#)

`variableType`
The type of the variable. Can be one of: TEXT, INTEGER, NUMBER, DATETIME or MEDIA.

Returns

[Number](#)
